Being Online Jian Wang, 2021-10-05 A pioneer of cloud computing and big data offers his vision of the future world taking shape around us. Jian Wang was the founder and architect of Alibaba's cloud and has been the driving force behind its technology innovations. He was also the founder of the City Brain initiative to develop a new digital infrastructure for sustainable cities. *Being Online* is his meditation on the moment we are in as the digital era shifts to the internet era, spawning new innovations at a seemingly dizzying pace: cloud computing, 5G, artificial intelligence, big data, wearables, robots, virtual reality, the internet of things, blockchain, and more. For Wang, the invisible hand that connects them is being online. The conjunction of computing, data, and the internet has erased the difference between being online and off. When computing can be done in the cloud, it is on the road to becoming a utility. When data is connected, making it big, its usefulness multiplies exponentially in unforeseeable ways, as does its value. This moment will be as transformative for humanity as Henry Ford's production line. Data is changing the nature of business. Computing is reshaping the economy. The cloud will help us do things

we could never do before at scales that were previously impossible It will reshape our vision of the world as electrification once did and more recently the transition from analog to digital While telling the story of Alibaba s breakthroughs and the development of his own understanding of the internet Jian Wang s visionary book lays out the implications of this shift and how to think about being online *Make / Believe* John Hartley,2025-01-23 This book illustrates that mediated popular culture and science based knowledge systems entangled and compromised as both have become are still a robust crucible for system change for the future when they combine forces Planetary crises require responses from everyone This means that collective action is not simply a scientific or political problem It is a problem of culture and media But modern politics journalism and science were not designed for global climate action They ve divided humans into competitive and often hostile we and they groups Identity news and knowledge are all weaponized Culture makes groups groups make knowledge and knowledge makes enemies What can be done to prevent global conflict and the drift to war Make Believe turns to popular culture and social media to argue for an alternative storyline While the Great Powers are making new enemies emergent classes led by children are using planetary connectivity to make new worlds A digital planet generates new kinds of strategic stories for pan human action based on difference intersectionality and cooperation for a sustainable Earth system Make Believe shows how alternatives to the Great Game of global contestation are gathering strength in unlikely places among women children lifestyle and pop culture Popular digital media literacy is now a prerequisite for the remediation of the planet
