## Goodreads Choice How To:

*Online Searching* Karen Markey, 2023-02-07 Online Searching prepares students in library and information science programs to assist information seekers at all levels from university faculty to elementary school students. Included in the third edition are interviews with librarians and other information professionals whose words of wisdom broaden graduate students' perspectives regarding online searching in a variety of work settings serving different kinds of information seekers. The book's chapters are organized according to the steps in the search process: 1. Conducting a reference interview to determine what the seeker wants; 2. Identifying sources that are likely to produce relevant information for the seeker's query; 3. Determining whether the user seeks a known item or information about a subject; 4. Dividing the query into main ideas and combining them logically; 5. Representing the query as input to the search system; 6. Conducting the search and responding strategically; 7. Displaying retrievals assessing them and responding tactically. A new chapter on web search engines builds on students' existing experience with keyword searching and relevance ranking by introducing them to more sophisticated techniques to use in the search box and on the results page. A completely revised chapter on assessing research impact discusses the widespread use of author and article iMetrics, a trend that has developed rapidly since the publication of the second edition. More than 100 figures and tables provide readers with visualizations of concepts and examples of real searches and actual results. Textboxes offer additional topical details and professional insights. New videos supplement the text by delving more deeply into topics such as database types, information organization, specialized search techniques, results filtering, and the role of browsing in the information seeking process. An updated glossary makes it easy to find definitions of terms used throughout the book. With new and updated material, this edition of *Online Searching* gives students knowledge and skills for success when intermediating between information seekers and the sources they need.

## [Crash Course in Readers' Advisory](#)

*Crash Course in Readers' Advisory* Cynthia Orr, 2014-12-05 One of the key services librarians provide is helping readers find books they'll enjoy. This crash course will furnish you with the basic practical information you need to excel at readers' advisory (RA) for adults and teens. The question "Can you recommend a good book?" can be one of the most daunting you face notwithstanding the fact that recommender tools are ubiquitous. Often uncertainty arises because although librarians are called on to perform such services daily, readers' advisory is a skill set in which most have no formal training. This guide will remedy that. It is built around understanding books, reading, and readers, and will quickly show you how to identify reading preferences and advise patrons effectively. You'll learn about multiple RA approaches such as genre appeal, features, and reading interests, and about essential tools that can help with RA. Plus you'll discover tips to help you keep up with this ever-changing field. There is no other professional book that covers the full spectrum of skills needed to perform the RA service that is in such great demand in libraries of all kinds. Helping readers find what they want is a sure way to serve patrons and build your library's brand. You will come away from this easy-to-understand crash course with the solid background you need to do both.
