[University Rankings, Diversity, and the New Landscape of Higher Education](#), 2019-02-18 University rankings are a relatively new phenomenon in higher education. Rankings attempting to measure university performance beyond national borders. No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world. This book is written as part of the effort to better understand rankings and their effects on higher education. A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed.
