Young People, Social Media and the Law Brian Simpson, 2017-11-22

This book critically confronts perceptions that social media has become a wasteland for young people Law has become preoccupied with privacy intellectual property defamation and criminal behaviour in and through social media In the case of children and youth this

book argues these preoccupations whilst important have disguised and distracted public debate away from a much broader and more positive consideration of the nature of social media In particular the legal tendency to consider social media as dangerous for young people to focus exclusively on the need to protect and control their online presence and privacy whilst tending to suspect or to criminalise their use of it has obscured the potential of social media to help young people to participate more fully as citizens in society Drawing on sociological work on the construction of childhood and engaging a wide range of national and international legal material this book argues that social media may yet offer the possibility of an entirely different and more progressive conceptualisation of children and youth

Content Strategy in

Technical Communication Giuseppe Getto, Jack Labriola, Sheryl Ruszkiewicz, 2019-09-19 *Content Strategy in Technical Communication* provides a balanced comprehensive overview of the current state of content strategy within the field of technical communication while showcasing groundbreaking work in the field. Emerging technologies such as content management systems, social media platforms, open source information architectures and application programming interfaces provide new opportunities for the creation, publication and delivery of content. Technical communicators are now sometimes responsible for such diverse roles as content management, content auditing and search engine optimization. At the same time we are seeing remarkable growth in jobs devoted to these other content centric skills. This book provides a roadmap including best practices, pedagogies for teaching and implications for research in these areas. It covers elements of content strategy as diverse as Editing Content for Global Reuse and Teaching Content Strategy to Graduate Students with Real Clients while giving equal weight to professional best practices and to pedagogy for content strategy. This book is an essential resource for professionals, students and scholars throughout the field of technical communication.
