Planting FLOWERS

Anybody can plant a flower. It's a very easy thing to do! (The tricky part is keeping it alive). First, you gather seeds of your favorite flower, some rich soil, a pot, and a watering can. Second, you put some soil into the pot until it's about three quarters full. Then you dig a little hole in the soil with your index finger. Put the seeds in the hole. Then, you cover the seeds with the soil until they're nowhere to be seen. Then, you take your watering can and put some water in the pot with your soil and seeds. Be careful not too much! Put your plant in the sun and watch it grow!

The term "three quarters" means

What is the last step to planting a flower?

What supplies do you need to plant a flower?

Did the author miss any steps? Which one(s)?

What should you do with your index finger?

Who can plant a flower?

Do not put...water into your pot!

What does the word "rich" mean in this passage?
