Brogan,Julien Stanwell Smith,2012-10-25 Anyone can write a blog post but not everyone can get it liked thirty five thousand times and not everyone can get seventy five thousand subscribers But the reason we ve done these things isn t because we re special It s because we tried and failed the same way you learn to ride a bike We tried again and again and now we have an idea how to get from point A to point B faster because of it Three short years ago when Chris Brogan and Julien Smith wrote their bestseller Trust Agents being interesting and human on the Web was enough to build a significant audience But now everybody has a platform The problem is that most of them are just making noise In The Impact Equation Brogan and Smith show that to make people truly care about what you have to say you need more than just a good idea trust among your audience or a certain number of fol lowers You need a potent mix of all of the above and more Use the Impact Equation to figure out what you re doing right and wrong Apply it to a blog a tweet a video or a mainstream media advertising cam paign Use it to explain why a feature in a national newspaper that reaches millions might have less impact than a blog post that reaches a thousand passionate subscribers Consider the phenomenally successful British singer Adele For most musicians onstage banter basically consists of yelling Hello Cleveland But Adele connects with her audience pausing between songs to discuss a falling out with her friends or the drama of a break up Each of these moments comes off as if she were talking directly with you and you can easily relate Adele has Impact As the traditional channels for marketing selling and influencing disappear and more people inter act mainly online the very nature of attention is changing The Impact Equation will give you the tools and metrics that guarantee your message will be heard *The Case for Community in Online Spaces* Brooke

Dunbar-Treadwell,2023-08-01 Many believe that our sense of community is dying as the result of our digitized world In this book Brooke Dunbar Treadwell refutes this claim and presents a case that connection is thriving in online spaces as people share stories practice vulnerability and build communities From memes to Reddit to Facebook Dunbar Treadwell offers perspectives that combine relevant scholarship with examples from her research pop culture and society She addresses some of the factors that contribute to disconnection like political division and dehumanization while also painting a picture of a society that desperately desires connection and may not always know how to find it Ultimately this book illustrates how community and connection have changed over time how they are currently alive and well while offering some important

practical advice for how readers can consider their own choices in online spaces to help them find the community that they seek. Scholars of communication media studies and political science will find this book of particular interest. *The Hidden Psychology of Social Networks: How Brands Create Authentic Engagement by Understanding What Motivates Us* Joe Federer, 2020-09-15. From the former Head of Brand Strategy at Reddit comes a proven and thought provoking approach to the digital economy and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology. Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology, anthropology, neuroanatomy, and psychology as well as more than a decade of hands-on experience to explain why people act so differently in various online spaces and what they are seeking from participating in each one. With a framework based on Freud's Id, Ego, and Superego model of the human psyche, he demonstrates how the internet is a digital reflection of the collective human psyche and how different social networks correspond to different mindsets: platforms like Reddit to the unfiltered Id, Facebook and Twitter to the managed Ego, and Instagram to the ideal Superego. In the same way you behave differently when you're home alone, out with friends, communicating with family, or interacting with coworkers, people act and express themselves differently in these various online spaces. Context matters. Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network. Learn how to create content that drives sharing and word of mouth, how brands can fit natively into different types of social channels, how to balance branded social presences across different networks, why authenticity will only grow in importance to consumers. Fascinating and deeply compelling, *The Hidden Psychology of Social Networks* will equip you to make vastly more efficient use of your media buys, establish more thoughtful strategies, develop better creative, and in the end, deliver more effective marketing that provides value.
