[c't Working with AI](#) c't-Redaktion, 2024-01-24 The special issue of c't KI Praxis provides tests and practical instructions for working with chatbots. It explains why language models make mistakes and how they can be minimised. This not only helps when you send questions and orders to one of the chatbots offered online. If you do not want to or are not allowed to use the cloud services for data protection reasons for example you can also set up your own voice AI. The c't editorial team explains where to find a suitable voice model, how to host it locally and which service providers can host it. The fact that generative AI is becoming increasingly productive harbours both opportunities and risks. Suitable rules for the use of AI in schools, training and at work help to exploit opportunities and minimise risks.

[Philosophy through Computer Science](#) Daniel Lim, 2023-03-17 What do philosophy and computer science have in common? It turns out quite a lot. In providing an introduction to computer science using Python, Daniel Lim presents in this book key philosophical issues ranging from external world skepticism to the existence of God to the problem of induction.

These issues and others are introduced through the use of critical computational concepts ranging from image manipulation to recursive programming to elementary machine learning techniques. In illuminating some of the overlapping conceptual spaces of computer science and philosophy, Lim teaches readers fundamental programming skills and allows them to develop the critical thinking skills essential for examining some of the enduring questions of philosophy.

Key Features Teaches readers actual computer programming not merely ideas about computers. Includes fun programming projects like digital image manipulation and Game of Life simulation, allowing the reader to develop the ability to write larger computer programs that require decomposition, abstraction and algorithmic thinking. Uses computational concepts to introduce, clarify and develop a variety of philosophical issues. Covers various aspects of machine learning and relates them to philosophical issues involving science and induction as well as to ethical issues. Provides a framework to critically analyze arguments in classic and contemporary philosophical debates.

Islamistisch motivierter Terrorismus ist seit Jahren im Fokus der Betrachtung von Medien, Politik und Gesellschaft. Staatliche und zivilgesellschaftliche Maßnahmen gegen den Islamismus reichen von der Präsentation gesetzgeberische und institutionelle Änderungen bis hin zu staatlichen Zwangsmassnahmen. Doch obwohl beim Umgang mit dem Islamismus immer auch Grundfragen liberaler und pluraler Gesellschaften angesprochen sind, mangelt es an Studien, die untersuchen, wann welche Maßnahmen ergriffen und wie sie begründet wurden.
