He has written several books in the In 30 Minutes series, including: Dropbox In 30 Minutes, Twitter In 30 Minutes, and Excel Basics In 30 Minutes. Here's what readers are saying about Google Drive and Docs In 30 Minutes: I am so glad this was made. I've been using Google Docs for a while now and have been encouraging my teacher colleagues to do so as well to facilitate collaboration. It has become my go to text book to help new users understand quickly. If you're new to Google Drive or Google Documents, this will help you. If you're experienced and want something to help those who come to you with questions, this is a nice tool to help them remember what you show them. I highly recommend it. I just got a new position that requires record keeping. Having used Google Docs in the past, I decided to update my knowledge. I googled Docs for dummies and this was one of the results. I liked the concept that the title implies: a concise guide that will distill what I need and allow me to complete a task quickly. A clear and concise explanation of how to navigate your way through Google Docs. Excellent introduction to Google Drive. Well researched, easy to read, nicely organized.

The Ridiculously Simple Guide to Google Apps (G Suite)

Scott La Counte, 2019-09-11 Chances are you grew up a Word and Office user. Maybe you were a rebel and committed your herd to OpenOffice or dare I say WordPerfect but for the majority of people our lives were loyal to Microsoft. In 2005 a small little startup named Upstartle developed something unheard of at the time a web based word processor called Writely. It pioneered the idea of writing on the cloud and changed the way people thought about word processing. Google noticed the little upstart and in 2006 they acquired the company. The software was abandoned and turned into what everyone knows today as Google Docs. It disrupted the industry namely Microsoft's industry. Today Google has a whole suite of productivity apps from documents to spreadsheets you can do just about anything from the cloud. Microsoft and Apple have each made big attempts to create cloud based environments of their own for office productivity but Google pioneered the idea and its collaborative online environment make it hard to beat. It's become so feature rich that many businesses are finding it to be the preferred way to conduct business. If you are thinking about making the switch to Google or have already made the switch but want to make sure you are using it correctly then this guide will walk you through it. It will show you all the basic features to make sure you can get up and running as quickly as possible. It covers Google Drive, Google Docs, Google Slides, Google Sheets, and Google Forms. Let's get started.
