Timo J. Hämäläinen, Risto Heiskala

Sources Of National Institutional Competitiveness Sense Making In Institutional Change:

Sources of National Institutional Competitiveness Susana Borrás, Leonard Seabrooke, 2015-01-29 How do countries create and replicate socio economic success This book argues that success comes from how people make sense of their institutions when they are placed under stress When institutional frameworks are challenged a range of agents engaged in sensemaking processes that invoke certain identities on who we are contain normative claims about how things should be and involve strategies on how to get there Sensemaking about the future and the past is crucial to institutional competitiveness and includes prospective and retrospective points of departure as well as focusing on developing abstract causes of change or replicating success from previous experience This book brings together a range of world class scholars from Comparative Political Economy Institutional Theory and Organizational Sociology to discuss how sensemaking processes create institutional change The contributors investigate a range of cases that cover different institutions linked to competitiveness including labour public management think tanks firms innovation policies tax and housing policies and welfare systems With a strong focus on the Nordic experience and comparisons with advanced industrialized economies this volume provides an innovative and original framework for understanding institutional change *The Changing Worlds and Workplaces of Capitalism* Felix Behling, Eoin Flaherty, Seán Ó Riain, Rossella Ciccia, 2015-08-05 The contributors investigate how the large scale structures of capitalism and the local social relations of workplaces and organizations shape each other They argue for a new integration of political economy and the sociology of work and organizations *The Paradox of Vulnerability* John L. Campbell, John A. Hall, 2017-08-29 Why are small and culturally homogeneous nation states in the advanced capitalist world so prosperous Examining how Denmark Ireland and Switzerland managed the 2008 financial crisis The Paradox of Vulnerability shows that this is not an accident John Campbell and John Hall argue that a prolonged sense of vulnerability within both the state and the nation encourages the development of institutions that enable decision makers to act together quickly in order to survive especially during a crisis Blending insights from studies of comparative political economy and nationalism and drawing on both extensive interviews and secondary data Campbell and Hall support their claim by focusing on the three states historically and more important in their different responses to the 2008 crisis The authors also devote attention to the difficulties faced by Greece and Iceland The implications of their argument are profound First they show that there is a positive side to nationalism social solidarity can enhance national prosperity Second because globalization now requires all states to become more adaptable there are lessons here for other states large and small Lastly the formula for prosperity presented here is under threat highly homogeneous societies face challenges in dealing with immigration with some responding in ways that threaten their success The Paradox of Vulnerability demonstrates how the size and culture of a nation contribute in significant ways to its ability to handle political and economic pressures and challenges **The Oxford Handbook of Employment Relations** Adrian Wilkinson, Geoffrey Wood, Richard

Deeg,2014-03-13 There have been numerous accounts exploring the relationship between institutions and firm practices However much of this literature tends to be located into distinct theoretical traditional silos such as national business systems social systems of production regulation theory or varieties of capitalism with limited dialogue between different approaches to enhance understanding of institutional effects Again evaluations of the relationship between institutions and employment relations have tended to be of the broad brushstroke nature often founded on macro data and with only limited attention being accorded to internal diversity and details of actual practice The Handbook aims to fill this gap by bringing together an assembly of comprehensive and high quality chapters to enable understanding of changes in employment relations since the early 1970s Theoretically based chapters attempt to link varieties of capitalism business systems and different modes of regulation to the specific practice of employment relations and offer a truly comparative treatment of the subject providing frameworks and empirical evidence for understanding trends in employment relations in different parts of the world Most notably the Handbook seeks to incorporate at a theoretical level regulationist accounts and recent work that link bounded internal systemic diversity with change and at an applied level a greater emphasis on recent applied evidence specifically dealing with the employment contract its implementation and related questions of work organization It will be useful to academics and students of industrial relations political economy and management

New Humanism And Global Governance Lijun Yang,Wei Shan,2018-07-26 New Humanism and Global Governance is the first in this subject to study how a variety of factors related to globalization will shape the future of the human community It discusses the major challenges to today's world order and governance as well as international experience in responding to these challenges It covers a wide range of issues including unequal distribution of wealth the widening income inequality gap contradiction between economic development and environmental protection the middle income trap de globalization democratic crisis anti immigration sentiments nationalism and radical extremism It addresses these issues by emphasizing policy implications for governance The chapters are selected papers from two international conferences jointly held by the Institute of Public Policy IPP at the South China University of Technology and UNESCO Contributors from China Europe and the US present their questions observations and analyses in a narrative and descriptive style which appeal to a wide range of audience

Political Economy of Capitalisms Robert Boyer,2022-09-03 This book is the English language translation of the French publication *conomie Politique des Capitalismes* Research in this book presents institutional and historical macroeconomics through an analysis of wage labour nexus innovation systems monetary and financial systems integration into the world economy formation of economic policy configurations and the history of economic theories In doing so the book addresses how and why economic regularities change in long run and why do macroeconomic adjustments differ across countries within the same historical period It shows how institutional changes that have occurred since the 1970s and the research on the transformation of the American and French capitalism have led to the emergence of a research agenda known as Regulation

Theory Readers would understand the permanent transformations of capitalism and its crises given the book's inclusion of long term historical studies systematic international comparisons for the contemporary period and the exploration of the institutional and social foundations of microeconomics which has led to the evolution of various brands of capitalism This translated work includes a Foreword by Associate Professor Elsa Lafaye de Micheaux and Professor Thomas Lamarche

Social Innovations, Institutional Change, and Economic Performance Timo J. Hämäläinen, Risto Heiskala, 2007 The current transformation of the world economy underlines the importance of systemic adjustment capacity for the long term success of industrial economies The expert contributors outline a theory of social innovation which differentiates between incremental and radical change processes and suggests areas where policy makers can facilitate proactive changes Case studies highlight the various rigidities of structural adjustment processes the economic importance of systemic adjustment capacity and the challenges of social innovation and structural change in different societies regions and sectors

Sociological Abstracts Leo P. Chall, 2004 CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences The database provides abstracts of journal articles and citations to book reviews drawn from over 1 800 serials publications and also provides abstracts of books book chapters

dissertations and conference papers **High Technology and International Competitiveness** Romesh Diwan, Chandana Chakraborty, 1991-11-30 Following World War II the U S manufacturing sector emerged as the dominant industrial force in the world in virtually all areas including productivity market share innovations and capital investments Though other countries have caught up with and surpassed the United States in many industries Romesh Diwan and Chandana

Chakraborty argue that America can recapture its dominant role by moving forcefully into high technology industries In this work they examine competitiveness in a range of high technology enterprises analyzing the industries as an aggregate as well as through three specific examples semi conductors telecommunications and computers The authors provide a complete understanding of the technical changes and developments that are taking place in U S high technology and offer guidance to policy makers in promoting competitive strength Their work defines and quantifies the high tech industrial sector of the U S economy and analyzes the productivity of this sector by utilizing a translog cost function which provides information about the structure of the input output relations in a particular industry Using these functions Diwan and Chakraborty answer quantitatively a number of questions relating to the growth of various inputs productivities and outputs which lead to conclusions regarding the structure of production costs and capacity in U S industry Their conclusions that technical change is biased in the main in favor of capital and material and that capital and skilled labor are complements are consistent with new ideas and theories in the field This work will be a valuable reference source for professional economists and policy experts as well as for scholars and students in international trade finance and development

Local and Regional Development Planning and Management Claudia Hoshino, 1996 United States Political Science Documents, 1993
