Hippolyte Adolphe Taine

The Art Of Translating Poetry:

The Art of Translating Poetry Burton Raffel, 1988-01-01 This book by a well known translator and critic is divided into two parts the first dealing with the linguistic and other more technical aspects of translating poetry the second involved with more practice oriented matters The chapters in Part One examine the specific constraints of language and the unavoidable linguistic bases of translation the constraints of specific languages forms and genres and prosody and comparative prosody Part Two looks at the subjective element in translation collaborative translation the translation of oral poetry and the translator's responsibility Languages discussed include Indonesian Japanese Chinese Old and Middle English French German Spanish Italian Persian Russian Latin and Greek The book argues *inter alia* that literal translation is impossible that no translation can fully create the original but that good literary translation can create a usable approximation that translation is secondary not only to the original work being translated but also to the linguistic and literary nature of the language being translated into that the literary translator's primary responsibility is to the work he is translating that there is nothing ever definitive about any translation that the poetry translator must be a poet and poems should not be translated into prose and that there must be a subjective identification between translator and translated work This is the first attempt to systematize linguistic information about the translation of poetry It is also the first book to range widely over the languages and literatures of the past and the present and European and Asian languages and literatures as well Raffel is the first author to combine in one study linguistic and scholarly knowledge and extensive experience of translation

The Art of Translating Prose Burton Raffel, 1994-01-01 There has been very little linguistically sound discussion of the differences between poetry and prose and virtually no discussion of any sort of the practical consequences of those differences for the translation of prose The Art of Translating Prose presents for both the specialist and nonspecialist the core strategies employed by the author in translating a variety of important prose texts and in the process delineates a coherent program or theory that can inform each act of translation Burton Raffel considers and effectively illustrates the fundamental features of prose those features that most clearly and idiomatically define an author's style He addresses those features that must be attended closely and imaginatively as one moves them from the original language work Raffel's insistence on concentrating on the artistic viability of the translation continues themes he explored in other books most notably *The Forked Tongue* and *The Art of Translating Poetry* Raffel finds the most important determinant for prose though not for poetry to be syntax which he argues must be tracked if the translation is to reflect the original author's style in a meaningful way Raffel ties together theory and practice to establish sound standards for the evaluation of prose translations and he provides examples in considerations of versions of such books as *Madame Bovary* *Germinal* and *Death in Venice*

Translation Mansoureh Bidaki,2023-07-25 This book is a review of the couplets of Baba Tahir a famous poet of ancient Iran as translated by Edward Heron Allen in 1901 Allen did so without access to the authentic phonetic tables of the poet s age which is admirable in its own right because some dialect words are specific to the speakers of the same geographical region based on the phonetics associated with them and despite the written or phonetic similarity with the dialect words of other regions they have different meanings Background about the challenges of poetry translation is given in the introduction and then the poet s life character and couplets are described in detail based on native and non native sources A selection of literal translations of dialect words based on the theories of Venuti 1965 and Baker 1992 and the implied meanings of the couplets are also reviewed This book is useful for English students who interested in poetry and other students who study the translation of literary texts
