## **The Backyard Bowyer The Beginners Guide To Building Bows:**

*The Backyard Bowyer* Nicholas Tomihama, 2011-03-10 With over 300 step by step pictures the Backyard Bowyer is geared for the beginning bowyer backyard hobbyist and anyone who has ever pondered building a wooden bow Easy to read and follow steps go down to even the smallest detail in the design and construction of basic archery bows Learn to craft fine wooden bows without huge investment in equipment and materials and without being bound by location and limited workspace Learn to construct A classic target flat bow an English Longbow suitable for hunting and even your own strings and arrows for traditional and primitive archery      Traditional Bowyer's Handbook Clay C. Hayes, 2017-11-11 I can't really explain my attraction to the bow and arrow I can't explain the pull of a camp fire either or the ocean or the open hills where you can see forever It's just there These things are in all of us I think some vestige of our primitive past buried so deep in our genome as to be inseparable from what it is to be human What we think of as civilization is a new experiment in the eyes of Father Time Experts say that humans have been around for some fifty thousand years We've been carrying the bow for maybe five thousand atlatls and spears before that and pushing the plow for maybe two thousand We have been hunters forever We are built to run to pursue big game on the open savannas to kill and eat them With the dwindling of the Pleistocene mega fauna mammoths and such the bow became more important and indeed helped to make us who we are today It still holds that attraction same as the hearth When I was a kid I would make crude bows from green plum branches big at one end and small at the other A discarded hay string would serve as a bowstring My arrows were fat and unfletched and would scarcely fly more than a few yards usually tumbling over in midair The small creatures around our home were plenty safe When I was about 12 or so my brother brought me two old Ben Person recurves he'd found at a yard sale One was a short bow probably no more than 48 inches and the other was more of a standard size They both drew about 50 lbs if I recall That fall happened to be a good year for cottontails around our little farm and I spent countless hours walking the fields and shooting at them as they busted from underfoot Although I'd get several shots a day I never did hit one on the fly but I remember that fall fondly nonetheless The pleasure of jumping rabbits and seeing the feathered shaft streaking toward them was a thrill I've never forgotten I made my first real bow when I was in high school after getting a copy of the *Traditional Bowyers Bible* in the mail more on this in a moment My first bow a decrowned mulberry flatbow broke within about 10 shots The second held together quite well and is probably still around somewhere and capable of shooting an arrow though it would probably draw about 70lbs When I first started making bows I used the woods I had close at hand mulberry common persimmon red maple white cedar etc I'd probably made more than a dozen bows of various woods before I ever saw a piece of Osage People often ask me where they can find a bow stave and invariably I tell them to use what they have close by No matter where you live you'll have something near that will make a bow Go cut it down and get started This book is an attempt to share some of what I've learned over my years of bow making The *Traditional Bowyers Bible* series as

mentioned earlier is still a great source of information Why write another book on making wood bows you might ask The simple answer is that there are so many ways of doing and explaining things There are still unanswered questions and we ll cover many of them here We will cover all of the most frequently asked questions and lay out a simple plan that should guide you through the entire process from finding a stave to stringing your bow and shooting your first arrow Some of what you ll find here you ll find nowhere else     Stick and String James E. Wadsworth,2017-04-07 Stick and String takes the mystery out of building a laminated fiberglass longbow Written for the beginner Stick and String is an illustrated guide that breaks down the process of bow building into 23 steps You will find detailed instructions links to suppliers and other bow building websites layout formulas advice on wood selection on grinding your own laminations on design and on finish This book is a guide and reference tool intended to give you the necessary foundations in bow building techniques so that you can build beautiful bows that will last a lifetime     *Take-Down Archery* Nicholas Tomihama,2012-09-22 Archery is a great sport and many understand the benefits of taking a bow while camping hiking or traveling Yet if you need to travel by bus foot plane or bike it can be very difficult to carry a full sized bow and set of arrows with you PVC plumbing pipe while an unlikely bow material allows for compact and effective take down bows to be made With just a few simple techniques a simple pipe can be transformed into a powerful and compact traditional bow that can easily fit in a pack or bag Take Down Archery will show you how to build your own bows put together take down arrows make strings and other essential tools for your own portable archery kit Take Down Bows Form PVC pipe into effective archery bows that break down to a compact size These bows can be made to fit easily in a bag or pack making them great for camping hiking travel or just transport without worrying about a large bow Take Down Arrows Convert commercial arrows into break down versions that fit right alongside a take down bow Also build a jig for putting feathers and vanes on your own arrows at home or in the field Bow Strings Build the jigs and tools to help make your own durable and efficient bow strings Learn to make an endless loop bow string a basic but efficient and precise string for any traditional bow Release Aid Make a simple release aid that saves your fingers and increases accuracy with shorter bows Arrow Rest Shoot both feathers and plastic vanes with a simple flip style arrow rest     The Bow Builder's Book Flemming Alrune,Wulf Hein,Jürgen Junkmanns,Boris Pantel,Holger Riesch,2012 Experienced bow builders and practical archaeologists describe the history evolution and construction of European style longbows in the revised second edition of this engaging book For the beginner clear uncomplicated instructions are offered including updated descriptions of construction techniques tools materials and shooting styles For more advanced bowyers there are tips on choosing wood and adhesive and explanations of the evolution adaptation of bow design including precise dimensions for replicating special historic bow types from Stone Age bows to modern laminated longbows This book also offers comprehensive instructions on how to properly test your newly built longbow and construct arrows This guide is ideal for the bow hunter bowyer and marksman looking for a new challenge     Archery for Beginners Amante P. introduction for anyone looking to break into the sport From selecting arrow shafts to refining your form to entering your first tournament it explains in straightforward no nonsense prose how to get started Whether you ve never shot an arrow or are making the move from compound bows you re certain to benefit from the author s time tested training program for instinctive shooting which develops a foundation of shooting skill through repetition

**The Impossible Bow** Nicholas Tomihama, 2011-09 Archery is almost as old as mankind itself manifesting in almost every culture and on almost every continent It is in many ways our link to the past and the stepping stone into another age It is one of the few ancient pastimes that are still relevant today Yet nowadays getting into the ancient sport of archery can be daunting for the average person with no experience or previous exposure to the subject For many the hefty price tags on modern bows or the seemingly impossible task of building a bow can be a surefire deterrent Many do not want to pay the price of a decent bow to try their hand at the bow and arrow simply to see if they enjoy it or not If only there was a way to make a bow good enough for a beginner without expending or gambling an immense amount of time or money on it What if you were told that there was such a bow That hidden in the ground in the heart of buildings on the shelves of most hardware stores and perhaps even in your home there was a material that made it all possible Would you believe it Well it is true and that material is PVC pipe the white or gray plastic pipe that can be found virtually everywhere It is possible with only a minimal investment and an hour of labor to make a fine bow for target archery that performs just as well as bows worth more than ten times as much A bow that if given a little more time and effort can be made into an efficient hunting tool or serious target shooter The Impossible Bow shows you how to construct your own PVC pipe bow with bows ranging from the incredibly simple to the incredibly complex Learn to build simple bows that require a minimum of tools and little time more complex bows that can be modified to fit the target archer as well as the experienced hunter looking for more of a challenge and finally a bow that accurately replicates the weapons of war of the steppe nomads The best part is that even the most complex bow should cost no more than 10 dollars and be completed in a day yet can hold up to the rigors of daily use Don t let anything hold you back from enjoying one of man s oldest and most noble of sports Join the backyard archery revolution with your very own bow that will defy everything you know and will baffle anyone who sees it Join me in building an impossible bow

Author s Notes The bows in this book are great for kids of all ages from the young to the young at heart Because of the ability of these bows to mimic many historical bow designs this book is great for re enactment archery as well as for the target archer If made well one design in particular works well for hunting and can be modified to work just as well as many primitive hunting bows This book covers how to make the generic PVC pipe bow that has been the mainstay of do it yourself archery for some time now as well as a couple designs which bring out the hidden performance of PVC as a bow material These bows also work well for survival situations and can be made small and can be kept virtually anywhere out of the sun In the trunk of a car in a boat in a hunting cabin your basement your attic the list goes on and on This book goes over how to make smooth shooting bows

from 30 to 70 pounds of pull that can perform well if taken care of While they aren't top performing bows they can certainly be used for hunting fishing and target archery
