*The Best Interface Is No Interface* Golden Krishna,2015-01-31 Our love affair with the digital interface is out of control We ve embraced it in the boardroom the bedroom and the bathroom Screens have taken over our lives Most people spend over eight hours a day staring at a screen and some technological innovators are hoping to grab even more of your eyeball time You have screens in your pocket in your car on your appliances and maybe even on your face Average smartphone users check their phones 150 times a day responding to the addictive buzz of Facebook or emails or Twitter Are you sick There s an app for that Need to pray There s an app for that Dead Well there s an app for that too And most apps are intentionally addictive distractions that end up taking our attention away from things like family friends sleep and oncoming traffic There s a better way In this book innovator Golden Krishna challenges our world of nagging screen based bondage and shows how we can build a technologically advanced world without digital interfaces In his insightful raw and often hilarious criticism Golden reveals fascinating ways to think beyond screens using three principles that lead to more meaningful innovation Whether you re working in technology or just wary of a gadget filled future you ll be enlightened and entertained while discovering that the best interface is no interface [SUMMARY - The Best Interface Is No Interface: The Simple Path To Brilliant Technology By Golden Krishna Shortcut Edition,2021-06-16](#)

Our summary is short simple and pragmatic It allows you to have the essential ideas of a big book in less than 30 minutes By reading this summary you will discover why it is fundamental to rethink your relationship to screens and interfaces in the development of innovative technologies You will also discover why we have developed a conflicting relationship with technology what is an interface and what is the difference between UI and UX that innovation does not necessarily mean developing an interface how it is possible to think about technology more simply how to put computers at our service rather than using them what are the challenges for better technological innovation To meet our new needs we have seen a huge number of mobile applications and screen based technologies flourish These interfaces between the user and his or her daily needs give technology an increasingly important place in our lives Instead of saving us time it becomes invasive and requires us to spend more and more time interacting with an interface Yet we have the means to think about more intuitive innovations that do not require an interface to work To do this we need to become aware of our relationship with technology in order to refocus on the reality of needs What is a good innovation New technologies can lead us to better manage our time and even save lives without asking us to spend even
