Tiger Portrait Of A Predator:

Tiger: Portrait of a Predator Valmik Thapar, 1999-04 Tiger Stephen Mills, 2004 A rare look at a magnificent predator. Powerful, long lean and intense, tigers are one of the world's most beautiful predators. Though fierce and efficient, an estimated 5,000 tigers are all that survive in the wild. Tiger provides a thorough understanding of this remarkable animal based on firsthand observations. Using stunning photography and maps, the book reveals how shrinking habitats and decreasing food supplies are forcing tigers to live in unnaturally high densities, often with deadly results. Tiger draws on the latest research and extensive field experience to deal with every aspect of its behavior: Social structures, Breeding patterns and family life, Martial arts like hunting tactics, Dietary favorites and oddities, Communication and interaction. Two hundred and fifty photographs capture tigers in range of activities: devouring prey in the jungle, at play with cubs, warding off scavengers at rest, and on the prowl. Fascinating commentary offers intriguing new ideas about supporting this critically endangered animal, a first step in ensuring that they never die out.

The Big Cats and Their Fossil Relatives Alan Turner, 1997 The author and illustrator draw on the surviving seven species of large cats and remains of their prehistoric ancestors to explain and illustrate their anatomy and function, social interaction, predatory behavior, prey treatment, and other aspects of the fascinating and fearsome creatures.

Mega Mammals in Ancient India Shibani Bose, 2020-01-02 Since antiquity, big mammals have inspired fear as well as fantasy among humans. Not only do megafauna pervade the domains of religion, art, literature, and folklore, it is also now widely acknowledged that they can serve as important, if not always adequate, indices of environmental quality. In this book, Shibani Bose looks into eras bygone in order to chronicle the journeys of three mega mammals: the rhinoceros, elephant, and tiger, across millennia in early north India. Carefully sifting through archaeological evidence and literary records in Sanskrit, Pali, Prakrit, and classical Western accounts, Bose documents the presence of these big mammals in diverse cultural contexts, from hunter-gatherer societies to the first urban civilization of India and beyond. This work aims to reconstruct human interactions with these mega-species through time while trying to understand the larger ecology of ancient India. This book is especially well-timed as the conservation of our megafaunal heritage is a major concern for biologists, ecologists, and conservationists. It underlines the need to historicize human interactions with these mega-mammals with the contention that awareness regarding their past is critical for their future.

Big Cats Tom Brakefield, Combines photography, research, and personal observations of the world's eight big cats.

Natural Enemies Michael J. Crawley, 2009-07-30 This book is about disease and death. It is an ecologist's view of Darwin's vivid evocation of Nature, red in tooth and claw. An international team of authors examines broad patterns in the population biology of natural enemies and addresses general questions about the role of natural enemies in the population dynamics and evolution of their prey. For instance, how do large natural enemies like wolves differ from small natural enemies like bacterial diseases in their effects on prey abundance? Is it better to chase after prey or sit and wait for it to come to you? How should

prey behave in order to minimize the risk of being eaten The answers are all in this fascinating senior undergraduate postgraduate text Large Carnivores and the Conservation of Biodiversity Justina Ray, Kent H. Redford, Robert Steneck, Joel Berger, 2013-04-09 Large Carnivores and the Conservation of Biodiversity brings together more than thirty leading scientists and conservation practitioners to consider a key question in environmental conservation Is the conservation of large carnivores in ecosystems that evolved with their presence equivalent to the conservation of biological diversity within those systems Building their discussions from empirical long term data sets contributors including James A Estes David S Maehr Tim McClanahan Andr s J Novaro John Terborgh and Rosie Woodroffe explore a variety of issues surrounding the link between predation and biodiversity What is the evidence for or against the link Is it stronger in marine systems What are the implications for conservation strategies Large Carnivores and the Conservation of Biodiversity is the first detailed broad scale examination of the empirical evidence regarding the role of large carnivores in biodiversity conservation in both marine and terrestrial ecosystems It contributes to a much more precise and global understanding of when where and whether protecting and restoring top predators will directly contribute to the conservation of biodiversity Everyone concerned with ecology biodiversity or large carnivores will find this volume a unique and thought provoking analysis and synthesis

Indonesian Primates Sharon Gursky-Doyen, Jatna Supriatna, 2010-01-15 Indonesia possesses the second largest primate population in the world with over 33 different primate species Although Brazil possesses more primate species Indonesia outranks it in terms of its diversity of primates ranging from prosimians slow lorises and tarsiers to a multitude of Old World Monkey species macaques langurs proboscis monkeys to lesser apes siamangs gibbons and great apes orangutans The primates of Indonesia are distributed throughout the archipelago Partly in response to the number of primates distributed throughout the Indonesian archipelago Indonesia is classified as the home of two biodiversity hotspots Wallacea and Sundaland In order to be classified as a hotspot an area must have a large proportion of endemic species coupled with a high degree of threat including having lost more than 70% of its original habitat Two areas within Indonesia meet these criteria The tremendous diversity of primates in Indonesia in conjunction with the conservation issues facing the primates of this region created a need for this volume *Tiger* Perseus, Valmik Thapar, 2004-07-06 A passionate first person narrative by Valmik Thapar who has spent most of the last thirty years observing tigers in the wild and fighting to ensure their survival is supplemented by the latest scientific findings and essays by twenty of the world s most renowned experts This stunning book explores every aspect of one of nature s most majestic animals making *Tiger The Ultimate Guide* as authoritative as it is beautiful Book jacket *Tiger-wallahs* Geoffrey C. Ward, Diane Raines Ward, 2000 For many years historian and screenwriter Geoffrey C Ward has been visiting the Indian jungles drawn by their beauty and the mystery and power of the great endangered predator that has always ruled them the tiger In this intensely personal book he combines history biography and first hand reporting to evoke the special appeal of India s forests and describes encounters with some of the tiger wallahs

who have struggled against overwhelming odds to save the species from extinction The remarkable tiger wallahs covered here are Jim Corbett the great destroyer of man-eaters who became a still greater conservationist Billy Arjan Singh the Spartan farmer who despises hunters and hunting tried to return a tigress to the wild and all alone carved out a national park Fateh Singh Rathore the uninhibited Rajput who cheerfully risked his life defending the jungles in his charge and Valmik Thapar the son of New Delhi intellectuals who began as Fateh's disciple became an authority in his own right and now champions a new kind of conservation that may provide the tiger's only hope An epilogue especially written for this edition brings the story of the tiger and its champions up to date This evocative and well illustrated book about a magnificent animal and its ablest defenders one of the first to document the conflicts that plague efforts to save the species will interest conservationists ecologists and wildlife enthusiasts and appeal to a wide general readership **Tigers** Valmik Thapar, 1989 Color photographs and text document the stages of development of three tigresses from birth to adulthood along with their families behavior The study was done in Ranthambhore National Park in northern India *The Tiger* Stuart P.
