**Balancing Alloantigen-Induced Immune Responses and Anti-tumor Immunity in Transplantation** Rita Maccario,Luigi Nespoli, Marcello Maestri,2025-09-12 Transplantation encompassing both hematopoietic stem cell and solid organ transplants is a critical medical intervention for treating various life threatening conditions However it is often complicated by alloantigen induced immune activation a response triggered by the donor s immune system against recipient antigens and or the recipient s immune system against donor antigens This immune activation can arise from prior sensitization events such as blood transfusions previous transplants or fetal maternal interactions While alloantigen induced immune responses can be beneficial as seen in the Graft vs Leukemia GvL or Graft vs Tumor GvT effects they can also lead to adverse outcomes like Graft vs Host Disease GvHD and graft rejection Several studies have highlighted the complex interactions between immune cell populations in these processes emphasizing the need for therapeutic strategies that balance long term donor recipient tolerance with the preservation of anti tumor immunity and protection against opportunistic infections Despite advancements there remains a significant gap in understanding the molecular and cellular dynamics of alloantigen induced immune activation necessitating

further research to develop more effective and tailored therapeutic approaches This research topic aims to explore and delineate both molecular and cell based therapeutic strategies designed to control the adverse effects of alloantigen specific immune responses while maintaining anti tumor immunity and protection against opportunistic infections in transplant recipients It encompasses a critical review of existing therapeutic modalities evaluates the latest advancements and highlights ongoing research focused on refining these strategies The objective is to foster a comprehensive understanding of the immune mechanisms at play and to identify innovative approaches that can enhance transplant outcomes
