The Culture Of Copying In Japan Critical And Historical Perspectives:

The Culture of Copying in Japan Rupert Cox, 2007-09-12 This book challenges the perception of Japan as a copying culture through a series of detailed ethnographic and historical case studies It addresses a question about why the West has had such a fascination for the adeptness with which the Japanese apparently assimilate all things foreign and at the same time such a fear of their skill at artificially remaking and automating the world around them Countering the idea of a Japan that deviously or ingenuously copies others it elucidates the history of creative exchanges with the outside world and the particular myths philosophies and concepts which are emblematic of the origins and originality of copying in Japan The volume demonstrates the diversity and creativity of copying in the Japanese context through the translation of a series of otherwise loosely related ideas and concepts into objects images texts and practices of reproduction which include shamanic theatre puppetry tea utensils Kyoto town houses architectural models genres of painting calligraphy and poetry sample food displays and the fashion and car industries

Theorizing Imitation in the Visual Arts Paul Duro, 2016-01-19 The theory and practice of imitation has long been central to the construction of art and yet imitation is still frequently confused with copying Theorizing Imitation in the Visual Arts challenges this prejudice by revealing the ubiquity of the practice across cultures and geographical borders This fascinating collection of original essays has been compiled by a group of leading scholars Challenges the prejudice of imitation in art by bringing to bear a perspective that reveals the ubiquity of the practice of imitation across cultural and geographical borders Brings light to a broad range of areas some of which have been little researched in the past

Visual Communication David Machin, 2014-04-30 The primary goal of the volume on Visual Communication is to provide a collection of high quality accessible papers that offer an overview of the different academic approaches to Visual Communication the different theoretical perspectives on which they are based the methods of analysis used and the different media and genre that have come under analysis There is no such existing volume that draws together this range of closely related material generally found in much less related areas of research including semiotics art history design and new media theory The volume has a total of 34 individual chapters that are organized into two sections theories and methods and areas of visual analysis The chapters are all written by quality theorists and researchers with a view that the research should be accessible to non specialists in their own field while at the same time maintaining a high quality of work The volume contains an introduction which plots and locates the different approaches contained in it within broader developments and history of approaches to visual communication across different disciplines as each has attempted to define its terrain sometimes through unique concepts and methods sometimes through those borrowed and modified from others

A Translation Theory of Knowledge Transfer Kjell Arne Røvik, 2023 This book develops a new theory about the challenges of transferring and sharing knowledge across organizational borders Knowledge transfer refers to processes through which actors and organizational units exchange receive and are influenced by the experience and knowledge of

others and can manifest itself through changes in the knowledge bases and performance of recipients. The capacity of an organization to transfer and exploit knowledge from other organizations is a key to its competitiveness, progress and survival. Thus, imitation is an important prerequisite for innovation. However, effective knowledge transfer is incredibly challenging; it sometimes succeeds but it frequently fails. Over the last 30 years, considerable research efforts have been made to identify the factors that account for the variations in outcomes of knowledge transfer processes. Chapter 2 of this book contains a comprehensive review of transfer theories and research findings. However, despite great research efforts and many new insights, much of the variation in knowledge transfer processes and outcomes remains unexplained, which calls for a re-theorizing of the subject. This book offers a new and fresh reframing of knowledge transfer across organizational borders. Based on extensive research, it outlines a new theory that conceptualizes knowledge transfer between organizations as acts of translation resembling the translation of language and texts. The author shows how involved actors' translation competence is a key to better understanding variations in knowledge transfer processes and outcomes. Thus, this new reframing both extends and challenges established theories of knowledge transfer.

The Japanese Restaurant Iori Hamada, 2023-08-04

This book explores the growth and operations of the Japanese restaurant in Australia since the early 2000s from perspectives of both restaurant workers and consumers. Through first-hand testimonies collected from chefs, restaurateurs, gourmets, and casual diners, it demonstrates how Japanese restaurants act as cultural hubs connecting a diverse community of migrants, Australian citizens, and international tourists while also disseminating knowledge of Japanese culinary cultures. The ethnographic evidence presented challenges the colonialist and essentialist understandings of the exotic and Japaneseness as the inferior other to the West. In so doing, the book highlights the complex manifestations of cross-cultural desires, translating practices, and the performative racial/ethnic mimesis of Japanese ethnicity. Featuring critical investigation into the fixed notions of otherness, race, ethnicity, and authenticity, this book will be a valuable resource to students and scholars of Japanese society and culture, particularly Japanese food culture.

Architecture RePerformed: The Politics of Reconstruction

Tino Mager, 2016-03-09

First emerging at the beginning of the twentieth century, architectural reconstruction has increasingly become an instrument to visually revive a long bygone past. This book deals with the phenomenon of meticulous reconstruction in architecture. It argues that the politics of reconstruction go far beyond aesthetic considerations. Taking architecture as a major source of history and regional identity, the impact of large-scale reconstruction is deeply intertwined with political and social factors. Furthermore, memories and associations correlated with lost buildings of a bygone era are heavily influenced by their re-appearance, something which often contradicts historical events. Reconstruction has become an established way of building and dealing with the past, yet so far there is no comprehensive scientific study on it. By bringing together eight case studies from Eastern Europe, France, Spain, China, Japan, Israel, and Brazil, it provides valuable insights into this topic. The chapters analyse the political background of the reconstructions and identify the protagonists. In doing so, this

volume adds to our understanding of the impact of reconstruction to memory and oblivion as well as the critical power of reconstruction regarding contemporary architecture and urbanism *Imagery of the Orchid Pavilion Gathering* Kazuko

Kameda-Madar,2022-10-04 This book examines the cultural networks that connected people during the Edo period 1603 1868 by surveying a wide range of visual representations of the Orchid Pavilion Gathering produced mostly in Japan The Orchid Pavilion Gathering is one of the most important painting themes in the cultural history of East Asia yet there has hitherto been no monograph focused on this subject in the English language This project introduces the many important images representing and related to the Gathering some of which have never before been published *The Japanese*
