The Culture Of Time And Space 1880 1918 With A New Preface:

The Culture of Time and Space, 1880–1918 Stephen Kern, 2003-11-30 Kern writes about sweeping changes in technology and culture between 1880 and World War I that created new modes of understanding and experiencing time and space To mark the book's 20th anniversary Kern provides a new preface about the breakthrough in interpretive approach that has made this a seminal work in interdisciplinary studies *The Culture of Time and Space 1880-1918* Stephen Kern, 1983-01-01 The cultural historian Stephen Kern claims that a new way of experiencing and conceptualizing time and space emerged in Europe and in America from 1880 to the end of World War I and that this change is best understood in terms of the technological innovations in transportation and communication that occurred during this tumultuous period His primary concern is to document the existence of this transformation rather than to explain it and thus he seeks to establish patterns of coherence rather than lines of causation His goals are to demonstrate the novelty of these conceptualizations and to illustrate their universality by describing their manifestations in widely divergent areas of cultural life The result is a richly detailed and absorbing narrative that synthesizes major events innovations and ideas in a wide variety of fields including art literature politics science and technology From <http://www.jstor.org> Oct 9 2014

~THEœ CULTURE OF TIME AND SPACE ~1880-1918œ (EIGHTEEN HUNDRED AND EIGHTY TO NINETEEN HUNDRED AND EIGHTEEN). Stephen

Kern, 1983 **The Culture of Time and Space 1880-1918** Stephen Kern, 2003 The Fin-de-Siècle World Michael Saler, 2014-11-20 This comprehensive and beautifully illustrated collection of essays conveys a vivid picture of a fascinating and hugely significant period in history the Fin de Siècle. Featuring contributions from over forty international scholars this book takes a thematic approach to a period of huge upheaval across all walks of life and is truly innovative in examining the Fin de Siècle from a global perspective. The volume includes pathbreaking essays on how the period was experienced not only in Europe and North America but also in China Japan the Middle East Latin America Africa India and elsewhere across the globe. Thematic topics covered include new concepts of time and space globalization the city and new political movements including nationalism the New Liberalism and socialism and communism. The volume also looks at the development of mass media over this period and emerging trends in culture such as advertising and consumption film and publishing as well as the technological and scientific changes that shaped the world at the turn of the nineteenth century such as the invention of the telephone new transport systems eugenics and physics. The Fin de Siècle World also considers issues such as selfhood through chapters looking at gender sexuality adolescence race and class and considers the importance of different religions both old and new at the turn of the century. Finally the volume examines significant and emerging trends in art music and literature alongside movements such as realism and aestheticism. This volume conveys a vivid picture of how politics religion popular and artistic culture social practices and scientific endeavours fitted together in an exciting world of change. It will be invaluable reading for all students and scholars of the Fin de Siècle period *The People, Place, and Space Reader* Jen Jack

Giesecking, William Mangold, Cindi Katz, Setha Low, Susan Saegert, 2014-04-16 The People Place and Space Reader brings together the writings of scholars designers and activists from a variety of fields to make sense of the makings and meanings of the world we inhabit. They help us to understand the relationships between people and the environment at all scales and to consider the active roles individuals groups and social structures play in creating the environments in which people live work and play. These readings highlight the ways in which space and place are produced through large and small scale social political and economic practices and offer new ways to think about how people engage the environment in multiple and diverse ways. Providing an essential resource for students of urban studies geography sociology and many other areas this book brings together important but till now widely dispersed writings across many inter related disciplines. Introductions from the editors precede each section introducing the texts demonstrating their significance and outlining the key issues surrounding the topic. A companion website PeoplePlaceSpace.org extends the work even further by providing an on going series of additional reading lists that cover issues ranging from food security to foreclosure psychiatric spaces to the environments of predator animals.

New Music and the Crises of Materiality Samuel Wilson, 2021-07-04 This book explores the transformation of ideas of the material in late twentieth and early twenty first century musical composition. New music of this era is argued to reflect a historical moment when the idea of materiality itself is in flux. Engaging with thinkers such as Theodor Adorno, Sara Ahmed, Zygmunt Bauman, Rosi Braidotti and Timothy Morton the author considers music's relationship with changing material conditions from the rise of neo liberalisms and information technologies to new concepts of the natural world. Drawing on musicology, cultural theory and philosophy the author develops a critical understanding of musical bodies, objects and the environments of their interaction. Music is grasped as something that both registers material changes in society whilst also enabling us to practice materiality differently.

Re-theorising Learning and Research Methods in Learning Research Crina Damşa, Antti Rajala, Giuseppe Ritella, Jasperina Brouwer, 2023-09-22 Re Theorising Learning and Research Methods in Learning Research explores the latest developments in the field of learning theory offering an overview of emerging methods and demonstrating how recent research contributes to furthering understanding of learning. This book illustrates how theory and methods inform one another facilitating advancements in the field while addressing the ways in which societal and technological change create a need for adapting approaches to examining learning. Drawing on an international team of contributors this book comprises 17 chapters and three commentaries thematically organised into three broad sections emerging theories and conceptualisations of learning and how they drive methodological development new methods or innovative use of existing methods and their contribution to theory development theories and methods that emerge in connection with societal changes. Both novice researchers and more experienced scholars will benefit from an overview of recent theoretical and methodological advances in the learning research field. This is an invaluable resource for researchers in the learning and educational research field and will also support Masters and PhD

students to understand how learning theories and research methodology in the field have been evolving in recent years

Mobility Peter Adey,2017-05-23 Mobility aims to take the pulse of this enormously expanded and energetic field It explores the breadth of the disciplinary areas mobility studies now encompass examining the diverse conceptual and methodological approaches wielded within the field and explores the utility of mobility to illuminate a cornucopia of mobile lives from the mass movements of individuals within global processes such as migration and tourism to homelessness and war from the entangled relations caught up in the movement of disease people and aid across borders to the inability of someone to cross over a road The new edition explores the more sustained elaboration of mobility studies within a wide variety of disciplinary approaches and subject matters It echoes the growing internationalization of mobility research reflected in diverse case studies from the Global South South Asia Latin America the Caribbean and so far under represented perspectives from China Australasia post socialist Eastern Europe the Middle East and elsewhere The book also features an additional chapter on mobility studies to survey and explore the diverse quality of the field and methodologies in order to reflect the growing diversity of methodological approaches to mobilities from walk alongs and critical cartography to the mobile arts The book offers an accessible reading of the way mobility has been tackled and understood neatly exploring and summarizing a topic that has exploded into different variations and nuances The text allows scholars and students alike to grasp the central importance of mobility to social cultural political economic and everyday terrains by providing accessible writings on key authors within key ideas and case study boxes suggested further readings and summaries while at the same time making a significant contribution to scholarly writings and debates

Becoming a Social Science Researcher Bruce Parrott,2023-03-28 Becoming a Social Science Researcher is designed to help aspiring social scientists including credentialed scholars understand the formidable complexities of the research process Instead of explaining specific research techniques it concentrates on the philosophical sociological and psychological dimensions of social research These dimensions have received little coverage in guides written for social science researchers but they are arguably even more important than particular analytical techniques Truly sophisticated social science scholarship requires that researchers understand the intellectual and social contexts in which they collect and interpret information While social science training in US graduate schools has become more systematic over the past two decades graduate training and published guidance still fall short in addressing this fundamental need

Time and Space in the Internet Age Stephen Kern,2024-08-01 This book analyzes how new technologies transformed life and thought between two periods 1880 1920 and 1980 2020 with a focus on temporal experiences of past present future and the spatial experiences of form distance and direction The signature contrast is between experiences of time and space transformed by the telephone in the earlier period and the Internet in the later period along with other sharp contrasts the sinking of the Lusitania in 1915 and the attack on the World Trade Center on 9 11 World War I and the Gulf Wars gravity bombs and smart bombs the pandemics of 1918 and 2020

assembly lines and flexible production Farmer s Almanacs and computer based weather predictions cash transactions and one click ordering decolonization and globalization internationalism and planetarity The book also makes three interpretive arguments the Epistemological Argument covers how greater knowledge introduced uncertainties the Ethical Argument tracks how new technologies prompted ethical judgments about their value and the Re hierarchizing Argument tracks the erosion of spatial hierarchies most notably in religion society and politics with the increasing progress of secularization social mobility and democratization Time and Space in the Internet Age is a thought provoking study for academics and general readers interested in the history of technology and science *American Folklore Studies* Simon J.
