The Deeds Of Louis The Fat:

The Deeds of Louis the Fat Abbot of Saint Denis, Suger, 1992 No description available *The Haskins Society Journal* 16 Diane Korngiebel, 2006 The Haskins Society presents papers from leading scholars on the political and social history of the Western European world through the Viking times via the Anglo Saxon kingdoms to the break up of the Carolingian state in the mid 13th century

The Crowning of Louis Nirmal Dass, 2003-02-10 Le Couronnement de Louis an anonymous work dating from about 1130 to 1140 is the earliest heroic epic of the William of Orange cycle and therefore lays the foundation for the entire chanson de geste genre It tells the story of William's defense of Louis son of Charlemagne during his childhood and William's heroic deeds as he battles Saracens and other villains This line by line translation closely follows the original Old French capturing the stylistic features that clearly mark the poem as oral literature A discussion of the poem's background and themes the William of Orange cycle and the chanson de geste genre precedes the translation *Abbot Suger of St-Denis* Lindy Grant, David Bates, 2016-02-04 Based on a fresh reading of primary sources Lindy Grant's comprehensive biography of Abbot Suger 1081-1151 provides a reassessment of a key figure of the twelfth century Active in secular and religious affairs alike Suger was Regent of France and also abbot of one of the most important abbeys in Europe during the time of the Gregorian reforms But he is primarily remembered as a great artistic patron whose commissions included buildings in the new Gothic style Lindy Grant reviews him in all these roles and offers a corrective to the current tendency to exaggerate his role as architect of both French royal power and the new gothic form

Capetian France 987-1328 Elizabeth M Hallam, 2014-06-06 In 987 when Hugh Capet took the throne of France founding a dynasty which was to rule for over 300 years his kingdom was weak and insignificant But by 1100 the kingdom of France was beginning to dominate the cultural and religious life of western Europe In the centuries that followed to scholars and to poets to reforming churchmen and monks to crusaders and the designers of churches France was the hub of the universe La douce France drew people like a magnet even though its kings were until about 1200 comparatively insignificant figures Then thanks to the conquests and reforms of King Philip Augustus France became a dominant force in political and economic terms as well producing a saint king Louis IX and in Philip IV a ruler so powerful that he could dictate to popes and emperors Spanning France's development across four centuries Capetian France is a definitive book This second edition has been carefully revised to take account of the very latest work without losing the original book's popular balance between a compelling narrative and an fascinating examination of the period's main themes

The Capetians Jim Bradbury, 2007-02-27 Following the demise of the Carolingian dynasty in 987 the French lords chose Hugh Capet as their king He was the founder of a dynasty that lasted until 1328 Although for much of this time the French kings were weak and the kingdom of France was much smaller than it later became the Capetians nevertheless had considerable achievements and also produced outstanding rulers including Philip Augustus and St Louis This wide ranging book throws fascinating light on the history of

Medieval France and the development of European monarchy **"That Old Pride of the Men of the Auvergne"** Avital Heyman, 2005 The title is an allusion to the description by Suger Abbot of St Denis of the men of the Auvergne Suger depicts that old pride in a chapter of his Deeds of Louis the Fat which chronicles the arrival of King Louis VI in the region 1122 and 1126 to succor Eimeric I the Bishop of Clermont obliged to flee his episcopal town after its seizure by the Count of Auvergne The citation provides a frame of reference for the subject of this study the Auvergnat laity and its relations with the Church as they can be deduced from the abundant representations of secular figures in Romanesque Auvergne A wide ranging interdisciplinary approach is brought into play in dealing with the art historical historical social political legal theological and liturgical aspects of the theme The first three chapters treat the various contexts in which secular characters appear Chapter 1 distinguishes between two series of lay donors and of avaricious persons Chapter 2 discusses figures of warriors in enigmatic contexts in the churches of Brioude and Riom es Montagnes Chapter 3 is concerned with non noble figures namely a group of rustic shepherds Chapter 4 examines the ecclesiastical condition in the province through a case study of the monastic community of Mozac The description of the peculiarities of Auvergnat Romanesque sculpture and the inquiry into the imagery as a product of the rival forces of Church and laity offers a new reading of such matters as property social hierarchy law liturgy and theology as they are reflected in stone The unrecorded past of the figures in various contexts of giving or of indulging in avarice war and bloodshed is perhaps compensated by this sculptural abundance **The Making of Saint Louis** Marianne Cecilia Gaposchkin, 2008 Canonized in 1297 as Saint Louis King Louis IX of France r 1226 1270 was one of the most important kings of medieval history and also one of the foremost saints of the later Middle Ages As a saint Louis became the centerpiece of an ideological program that buttressed the ongoing political consolidation of France and underscored Capetian claims of sacred kingship M Cecilia Gaposchkin reconstructs and analyzes the process that led to the monarch's canonization and the consolidation and spread of his cult Differing political and religious ideals produced competing images of the sanctity of Louis in late thirteenth and early fourteenth century France Drawing on hagiography sermons and liturgical evidence the latter a rich but little explored historical source Gaposchkin shows how various groups including Dominicans Cistercians and Franciscans and individuals such as Philip the Fair and Joinville used commemoration of the saint king to sanctify their own politics and notions of identity and religious virtue Louis cult was disseminated to a wider nonelite public through sermons in the fourteenth and fifteenth centuries and then revived by the Bourbon kings in the seventeenth century In deepening our knowledge of this royal saint this elegantly written book opens the curtain on the religious sensibilities and secular politics of a transitional period in European history **Paris** Alexandra Gajewski, John McNeill, 2023-07-24 Paris The Powers that Shaped the Medieval City considers the various forces royal monastic and secular that shaped the art architecture and topography of Paris between c 1100 and c 1500 a period in which Paris became one of the foremost metropolises in the West The individual contributions written by an international group of scholars cover the

subject from many different angles They encompass wide ranging case studies that address architecture manuscript illumination and stained glass as well as questions of liturgy religion and social life Topics include the early medieval churches that preceded the current cathedral church of Notre Dame and cultural production in the Paris area in the late 12th and early 13th centuries as well as Paris s chapels and bridges There is new evidence for the source of the c 1240 design for a celebrated window in the Sainte Chapelle an evaluation of the liturgical arrangements in the new shrine choir of Saint Denis built 1140 44 and a valuable assessment of the properties held by the Cistercian Order in Paris in the Middle Ages Also the book investigates the relationships between manuscript illuminators in the 14th century and representations of Paris in manuscripts and other media up to the late 15th century Paris The Powers that Shaped the Medieval City updates and enlarges our knowledge of this key city in the Middle Ages

The Sanctification and Memorialization of Louis IX of France, 1297-1350 Marianne Cecilia Gaposchkin, 2001

A Garland of Satire, Wisdom, and History Jan M. Ziolkowski, Bridget K. Balint, 2007 This book brings into print editions translations and commentaries for more than two dozen unique poems in Latin from the late eleventh and early twelfth century preserved in Houghton Library s anthology known as MS Lat 300 This book offers unparalleled access to the anthology previously unavailable in English From a literary point of view those interested in lyric poetry composed in Old French and Old Provençal have paid increasing attention to Latin poetry that circulated in France and of course those wishing to trace the background of the Carmina Burana have reason to study this kind of collection but many poems remain unedited and even more cry out for translation and contextualization With the publication of the accompanying facsimiles palaeographers may now be able to solve the puzzle of where the manuscript originated its story between the Napoleonic wars and 1965 when it was purchased by Harvard All told this volume opens the way to advances in medieval studies

The Cultural Power of Medieval Monarchy Manuel Alejandro Rodríguez de la Peña, 2023-09-22 This book focuses on why the diffusion of the political theology of royal wisdom created Solomonic princes with intellectual interests all around the medieval West and how these learned rulers changed the face of Western Europe through their policies and the cultural power of medieval monarchy Princely wisdom narratives have been seen simply as a tool of royal propaganda in the Middle Ages but these narratives were much more than propaganda being rather a coherent ideology which transformed princely courts shaped mentalities and influenced key political decisions This cultural power of medieval monarchy was channelled mainly through princely patronage of learning and the arts but the rise of administrative monarchy and its bureaucracy are equally related to these policies This can only be understood through a cultural approach to the history of medieval politics that is a history of the relationship between knowledge and power in the Middle Ages a topic much analyzed regarding the medieval church but sometimes neglected in the princely sphere This volume is a study that supplies an important comparative study of the reception in princely courts of a key aspect of European medieval civilization The ideal of Christian sapiential rulership and its corollary rationality in government This
