*Core Topics in Pain* Anita Holdcroft, Sian Jaggar, 2011-03-03 Originally published in 2005 *Core Topics in Pain* provides a comprehensive easy to read introduction to this multi faceted topic It covers a wide range of issues from the underlying neurobiology through pain assessment in animals and humans diagnostic strategies clinical presentations pain syndromes to the many treatment options for example physical therapies drug therapies psychosocial care and the evidence base for each of these Written and edited by experts of international renown the many concise but comprehensive chapters provide the reader with a guide to all aspects of pain It is an essential book for anaesthetic trainees and is also an invaluable first reference for surgical and nursing staff ICU professionals operating department practitioners physiotherapists psychologists healthcare managers and researchers with a need for an overview of the key aspects of the topic

*The Design of Analgesic Clinical Trials* Mitchell Max, Russell K. Portenoy, Eugene M. Laska, 1991 Presents a guide to the clinical evaluation of agents and methods for acute and chronic pain control Topics include chronic drug studies tailoring designs to patients with specific diseases probing neural mechanisms of pain and integrating advances in pharmacokinetics

*Issues in Palliative Care Research* Russell K. Portenoy, Eduardo Bruera, 2003-01-30 Palliative care is rapidly evolving as a multidimensional therapeutic model devoted to improving the quality of life of all patients with life threatening illness Symptom control management of psychosocial and spiritual concerns decision making consistent with values and goals and care of the imminently dying that is appropriate and sensitive to the unique needs of the individual and the family these are among the critical issues addressed through palliative care As this discipline has evolved the need for research in all these areas has become widely acknowledged *Issues in Palliative Care Research* describes both the progress that already has been made in the investigation of these issues and the methodologic elements that must be addressed in future studies The perspective is broad and the overriding goal is to inform about the state of the art in these rapidly evolving areas of research

**Principles and Practice of Clinical Research** John I. Gallin, Frederick P Ognibene, 2012-05-31 This expanded third edition provides an introduction to the conduct of clinical research as well as more comprehensive and expansive content about the infrastructure necessary for a successful clinical research organization or enterprise With authors who are experts in clinical research in both the public and private sectors this publication provides essential information to clinical investigators who wish to develop and conduct well designed patient based research protocols that comply with rigorous study design ethical and regulatory requirements

**Neuropathic Pain** Robert H. Dworkin, 2012-05-11 The incidence of neuropathic pain continues to rise yet it is an affliction often misdiagnosed or inadequately treated Although in recent years considerable research has been dedicated to understanding its mechanisms there have been few advances in treatment The contributors to this book are internationally renowned leaders in the fields of peripheral neuropathy and neuropathic pain They discuss clinical approaches to diagnosis and treatment of neuropathic pain its underlying mechanisms and strategies for

prevention In addition chapters cover timely issues including legal and ethical concerns surrounding pain treatment the status of clinical trial methods and educational efforts Comprehensive yet concise this book serves as a guide for diagnostic approaches and treatment of neuropathic pain for the student resident practicing physician researcher and specialist **An Evidence-based Resource for Pain Relief** Henry J. McQuay,R. Andrew Moore,1998 Brings together reviews of pain management trials examining the evidence for the effectiveness of many of the interventions commonly used in pain relief Aims to draw together an approach for assessing evidence how to find the papers criteria by which to judge them what data to extract and how to handle that data Opioids II ,1993-02-24 This two volume book provides the first comprehensive survey of opioid research a field which has accumulated a tremendous amount of literature since the identification of opioid receptors and their endogenous ligands In more than 60 chapters experts present state of the art reviews of this fascinating field the topics ranging from molecular biology to clinical applications Part I covers the multiplicity of opioid receptors the chemistry of opiates and opioid peptides as well as the neurophysiology of opioids Part II reviews a broad spectrum of physiological and behavioral functions and pharmacological actions of opioids together with their neuroendocrinology opioid tolerance and dependence concluding with pathophysiological aspects and clinical use *Towards the Use of Noradrenergic Agonists for the Treatment of Pain* Jean-Marie R. Besson,G. Guilbaud,1992 Efforts of many workers in the field of Pain research over the past few years to design novel analgesics have unfortunately not significantly increased the availability of real new drugs for the pharmacological treatment of pain Morphine or related agonists remains the most effective remedy to relieve severe pain despite some very real progress made in pain management over the past decade The development of new experimental models of clinical pain appears to be essential Many data suggest great potential for using the noradrenergic modulation either at central or even at peripheral levels However it appears from the present book that basic scientists and clinicians should be prudent before definitive conclusions A detailed listing of the papers provided in this publication is provided hereunder Proceedings of the 8th World Congress on Pain Troels Staehelin Jensen,Judith A.
