

The background of the slide is a photograph of two young girls hugging outdoors. The girl on the left has long, wavy blonde hair and is wearing a light blue denim shirt. She is smiling broadly and has her arms around the other girl. The girl on the right has short blonde hair and is wearing a white fuzzy sweater over a purple patterned shirt. She is also smiling and looking towards the camera. They are standing on a ground covered with fallen yellow and brown leaves, with a dark, out-of-focus background of trees and foliage.

The Development Of Children S Friendships The Development Of Children S Friendships:

The Development of Children's Friendships Steven R. Asher, John M. Gottman, 1981-05-29 When this book was first published in 1978 it was only recently that researchers had begun to focus on children's peer relationships and the impact of these relationships on their development. The contributors to this volume view friendship as an important context for the study of a variety of cognitive and affective processes from the perspectives of a wide range of disciplines. The volume poses an array of fascinating theoretical questions and offers varied methodological tools for answering them. Some contributors present and review applied research addressed to conceptualizing and ameliorating peer relationship problems whilst others reflect applied or policy orientated concerns in chapters on racial integration and the integration of mentally retarded children into regular classrooms. A chapter on the scientific, political and social history of the interest in children's friendships and two summary chapters add to the usefulness of the book for students. Rizzo, 1989 This book reports the author's five month ethnography of first grade children's friendships. It is the first detailed investigation of the dynamic psychosocial processes by which young children formulate friendships in school. The book addresses two major questions: How does the social ecology of a public school classroom affect children's interactions and peer relations?

and what are the important psychosocial processes by which children initiate and cultivate friendships at school The book aims to generate hypotheses about friendship development among young children and specifically to identify the chain of events by which children come to consider themselves friends and to analyze these events from a developmental perspective
