

A watercolor illustration featuring the profiles of five diverse individuals facing each other in a row. From left to right: a woman with blonde hair in warm orange and yellow tones; a woman with curly hair in vibrant red, pink, and blue; a person with dark curly hair in deep blue and purple; a woman with long red hair in shades of pink and red; and a man with short dark hair in cool green and blue tones. The background is a soft, pale yellow. Overlaid on the center of the illustration is the text "Gender Inclusivity" in a large, bold, white sans-serif font with a thick black outline.

The Difference It Makes A Resource On Gender For Educators:

Resources in Education ,1996-10 **The Difference it Makes** Anne Chapman,1988 The recent flood of new information on structuring human experience along gender lines and on the female component of human experience has profound implications for education The new scholarship shows that much of what people once assumed to be innate gender difference is in fact produced by adults different behavior toward boys and girls of which adults may themselves be unaware It also shows that the demands on women and men in workplace and family differ greatly from what they were even a generation ago and that gender stereotypic responses to these demands are detrimental to both men and women Schools may be promoting gender stereotypic thinking and behavior by the courses that are offered the manner in which students are expected to behave and perform how students are taught counseled and coached and what personnel policies and compensations are offered This volume summarizes recent reliable information on cognitive and affective differences between girls and boys and looks at the effects of school and schooling on them More important it suggests ways to see whether assumptions often taken for granted about men and women are appropriate and where they are not how to work toward change A 48 item annotated bibliography is divided into reference and interdisciplinary works academic subject areas and nonacademic areas of school life Lists of 38 publishers catalogs and 6 audiovisual distributors catalogs of materials on women and gender are included JB *Resources in Education* ,1997 *Gender Analysis for Educational Policy Making* ,1998 *New York State Education Department Bulletin* ,1924 Annual Report of the State Superintendent of Education South Carolina. State Department of Education,1879 **The Journal of Education** ,1906 **Rediscovering the Democratic Purposes of Education** Lorraine McDonnell,P. Michael Timpane,Roger W. Benjamin,2000 Why do America s public schools seem unable to meet today s social challenges As competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education Public schools were envisioned by the Founders as democratically run institutions for instilling civic values but today s education system seems more concerned with producing good employees than good citizens Meanwhile our country s diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools This volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education Nine original articles by some of today s leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived It both establishes the intellectual foundation for revitalizing American schools and offers concrete ideas for how the educational process can be made more democratic The authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship An initial series of articles reexamines the original premise of American education as articulated by important thinkers like Jefferson and Dewey A second group identifies flaws in how

schools are currently governed and offers models for change A final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy Spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy It offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to America s future
