The Diversity Of Social Pedagogy In Europe:

The Diversity of Social Pedagogy in Europe Jacob Kornbeck, Niels Rosendal Jensen, 2009 Situated at the intersection between social work and education social pedagogy is an original and dynamic academic and professional tradition It can be found across most European countries and shows great variety being closely connected to specific national and sometimes even regional cultures and structures Yet despite this diversity social pedagogy also has many common features cross nationally The aim of the book is to illustrate this diversity via a selection of case studies from Denmark France Germany Poland and Sweden Although social pedagogy is in many countries a profession that represents a sizeable workforce very little has been written about it from a European perspective Comparative literature tends to look at social work whereby social pedagogy is obscured But while there is a lack of comparative social pedagogy literature interest in social pedagogy is growing This is particularly so in the United Kingdom where no social pedagogy tradition exists but policy developments point to the emergence of a social pedagogy paradigm both in academia and in terms of careers This book aims to help fill the gap Case studies deal with theoretical and practical aspects of social pedagogy professional education fields of practice and research as well as links with other academic and professional paradigms

Social Work Education and Training Joyce Lishman, 2011-09-15 This volume provides an overview of social work education including the background and current context It covers the key debates surrounding social work education such as the evaluation of Social Work Education the use of IT research mindedness and the effectiveness of interdisciplinary education

Working with Young People Xavier Úcar, Pere Soler-Masó, Anna Planas-Lladó, 2020 It is common to refer to the dynamism and vitality of young people as a source of change creation and innovation but they are often also considered a problem that we do not know how to respond to Young people can make adults feel uncomfortable because they are neither children who can be told what to do nor adults to be treated as equals From the perspective of adults their status is socially and culturally ambiguous

Social Work in Europe, 2002 **Perspectives on European Social Work** Walter Lorenz, 2006 The book offers explanations and clarifications for the bewildering variety of titles and job profiles in the social professions in Europe It presents them both as a product of specific national welfare arrangements and as a sign of a special kind of professional autonomy that so far helped to correct national welfare trends Now this autonomy is once more called for in the light of the complete restructuring of all European welfare states and a European model of social work could deliver impulses for real alternatives to growing exclusion and inequality

Biography and Social Exclusion in Europe Prue Chamberlayne, Michael Rustin, Tom Wengraf, 2002 Based on 250 life story interviews in seven European Union countries Biography and social exclusion in Europe analyses personal struggles against social exclusion to illuminate local milieus and changing welfare regimes and contexts points to challenging new agendas for European politics and welfare beyond the rhetoric of communitarianism and the New Deal vividly illustrates the lived experience and environmental complexity working for and against structural

about the variety of approaches across Europe and to consider how social work will respond to the challenge of the New Europe

Higher Education for Diversity, Social Inclusion and Community Sjur Bergan, Ira Harkavy, 2018 How does the Council of Europe put into practice its commitment to the promotion of a culture of democracy through education Over the past decade or so our societies have been facing increasing difficulties in reconciling acceptance of diversity and social inclusion with the need for community The search for simple solutions to complex problems the fact that fake news and alternative facts are no longer seen as nonsensical expressions our responses to migration and the refugee crisis and the growth of populism in many parts of Europe present challenges to our societies and not least to education Authors from Europe North America and South Africa outline how higher education could respond to these challenges The first section makes a strong case for the continuing importance of higher education and research to modern society The second focuses on higher education institutions and the need for inclusive and diverse campuses The third section considers opportunities to improve the inclusion of refugees and immigrants in higher education Whereas the focus in Europe is mostly on refugees in the United States it is largely on immigrants further accentuated by the debate on the Dreamers

Handbook of Social Work in Health and Aging Barbara Berkman, 2006-02-09 The fields of health care aging and social work are often treated as discrete entities while all social workers deal with issues of health and aging on a daily basis regardless of practice specialization The Handbook of Social Work in Health and Aging is the first reference to address this reality by compiling the most current thinking on these subjects in a single volume With the population of older adults increasing as rapidly as new possibilities for their care professionals need an accessible source of specialized information about how best to serve the elderly and their families and they will find this authoritative handbook indispensable In 100 original chapters the most experienced and prominent gerontological health care scholars in the United States and across the world provide social workers with up to date knowledge of evidence based practice guidelines for effectively assessing and treating older adults and supporting their families The contributing authors paint rich portraits of a variety of populations that social workers serve and arenas in which they practice followed by detailed recommendations of

best practices for an array of physical and mental health conditions Its unprecedented attention to diversity global trends and implications for research government policy and education make the publication of such a compendium a major event in the field of gerontological social work Ambitious and multi dimensional this handbook represents the best research on health and aging available to social workers today The European Union and the Modernization of the Turkish Education System Bulent Tarman,2008 The European Union and the Modernization of the Turkish Education System examines the reconstruction of Turkish history social studies curriculum and assesses how well the program conforms to the established European Union EU directions and norms In this age of globalization the extent to which the EU can impose its educational norms on Turkish education as the membership process unfolds is in question Therefore the problem addressed in this study concerns the relationship between educational and national development in Turkey and the degree of influence the EU can exercise appropriately on that development The complexity of integrating one nation with another is significantly difficult in itself The challenge of integrating culturally distinct national entities into a functioning peaceful community of states increases this difficulty by several orders of magnitude This book explores the conflicting imperatives and the efforts to establish commonality In this area the influence of history social studies education becomes the focus as it is the vanguard for establishing permanently altered mindsets for the ultimate good of both Turkey and the European community Finally of ultimate importance to this study is the status of evolutionary change in Turkish history social studies education Based upon the assumption that EU membership for Turkey is a positive step toward avoiding marginalization in the increasing integration motivated by globalization an evaluation of the current status and the necessary progression of change is not only logical but also imperative for this study s value This landmark book examines the role of education as Turkey transits from a nationalistic orientation toward EU membership and its inherent multinational multicultural integration Of particular concern in this regard are the following 1 the issues of sovereign and supra nationalism which challenge Turkey s candidacy for membership in the EU in general 2 the tense relationship between formal education and political power in Turkey 3 the specific tension and its reflection in the new social studies program and 4 under these circumstances the progress challenges and needed reforms to accomplish history social studies education reforms for both Turkey and EU candidacy requirements This study strives to reconcile the issues of Turkish accession the implementation of EU educational standards and policies the influence of political change with regard to the EU on history social studies texts in Turkey and the differences between traditional pedagogy and curricular reforms for the whole of Turkish Education This study considers the historical framework of the relationship between Turkey and the EU Turkey s efforts toward educational modernization the rationale for such initiatives and their role as creating complicating factors for both national education reform and simultaneously EU acceptance of Turkey as a nation and in particular its history social studies curriculum The European Union and the Modernization of the Turkish Education System is an important book for all history social studies educators and policy
