The Early Heidegger And Medieval Philosophy Phenomenology For The Godforsaken:

The Early Heidegger and Medieval Philosophy S. J. McGrath, 2006 This is an interpretive study of Heidegger's complex relationship to the medieval tradition The text examines how the enthusiastic defender of the Aristotelian Scholastic tradition became the great destroyer of metaphysical theology *Heidegger* S.J. McGrath, 2008-08-20 Martin Heidegger 1889-1976 is one of the greatest conundrums in the modern philosophical world by turns inspiring and mind bogglingly frustrating In this critical introduction S J McGrath offers not a comprehensive summary of Heidegger but a series of incisive takes on Heidegger's thought leading readers to a point from which they can begin or continue their own relationship with him BOOK JACKET

The Bergsonian Mind Mark Sinclair, Yaron Wolf, 2021-12-30 Henri Bergson 1859-1941 is widely regarded as one of the most original and important philosophers of the twentieth century His work explored a rich panoply of subjects including time memory free will and humour and we owe the popular term *lan vital* to a fundamental insight of Bergson's His books provoked responses from some of the leading thinkers and philosophers of his time including Albert Einstein William James and Bertrand Russell and he is acknowledged as a fundamental influence on Marcel Proust The Bergsonian Mind is an outstanding wide ranging volume covering the major aspects of Bergson's thought from his early influences to his continued relevance and legacy Thirty six chapters by an international team of leading Bergson scholars are divided into five clear parts Sources and Scene Mind and World Ethics and Politics Reception Bergson and Contemporary Thought In these sections fundamental topics are examined including time freedom and determinism memory perception evolutionary theory pragmatism and art Bergson's impact beyond philosophy is also explored in chapters on Bergson and spiritualism physics biology cinema and post colonial thought An indispensable resource for anyone in Philosophy studying and researching Bergson's work The Bergsonian Mind will also interest those in related disciplines such as Literature Religion Sociology and French Studies

Heresy and the Making of European Culture Andrew P. Roach, James R. Simpson, 2016-04-22 Scholars and analysts seeking to illuminate the extraordinary creativity and innovation evident in European medieval cultures and their afterlives have thus far neglected the important role of religious heresy The papers collected here reflecting the disciplines of history literature theology philosophy economics and law examine the intellectual and social investments characteristic of both deliberate religious dissent such as the Cathars of Languedoc the Balkan Bogomils the Hussites of Bohemia and those who knowingly or unknowingly bent or broke the rules creating their own unofficial orthodoxies Attempts to understand police and eradicate all these through methods such as the Inquisition required no less ingenuity The ambivalent dynamic evident in the tensions between coercion and dissent is still recognisable and productive in the world today *Christian Ethics in a Technological Age* Brian Brock, 2010-06-28 Through close analysis of the historical and conceptual roots of modern science and technology Brian Brock here develops a theological ethic addressing a wide range of contemporary perplexities about the moral challenges raised by new technology *Nocturnal Seeing* Elliot R. Wolfson, 2024-10-29 In this

erudite new work Elliot R Wolfson explores philosophical gnosis in the writings of Susan Taubes Gillian Rose and Edith Wyschogrod The juxtaposition of these three extraordinary albeit relatively neglected philosophers provides a prism through which Wolfson scrutinizes the interplay of ethics politics and theology The bond that ties together the diverse and multifaceted worldviews promulgated by Taubes Rose and Wyschogrod is the mutual recognition of the need to enunciate a response to the calamities of the twentieth century based on an incontrovertible acknowledgment of the decadence and malevolence of human beings without however succumbing to acrimony and despair The speculation of each of these philosophers on melancholia and the tragicomedy of being is unquestionably intricate exhibiting subtle variations and idiosyncrasies but we can nevertheless identify a common denominator in their attempt to find the midpoint positioned between hope and hopelessness As Wolfson articulates Taubes Rose and Wyschogrod exemplify a philosophical sensibility informed by a nocturnal seeing which is not merely a seeing in the night but rather a seeing of the night Ultimately the book reveals the potential for these thinkers ideas to enhance our moral sensitivity and to encourage participation in the ongoing struggle for meaning and decency in the present Metaphysics as Mediating Dialogue Olivia Blanchette,2023-07-07

Metaphysics is not often spoken of as a venue for dialogue about anything let alone culture or religion which are more readily associated with phenomenology or hermeneutics in contemporary thinking This collection of essays however by the late Boston College philosopher Oliva Blanchette maintains the absolute necessity of metaphysics as a prerequisite for examining any particular realm of being in all areas of human inquiry from the particular sciences to historical cultures and religions Blanchette proposes metaphysics as a fundamental and necessary level of intelligence presupposed in any exercise of judgment discourse or dialogue among rational beings At the same time he defends the idea that dialogue is the first and most fundamental form in which such reasoning takes place in human experience on a radically intersubjective level through language Metaphysics is not an abstraction removed from human experience Rather it is a science in its own right defining itself in relation to being as being its subject matter as it depends on all the particular sciences and bodies of knowledge Firmly standing on the ground of human experience and on the human person as primary analogate of being it opens up an entire realm of questioning that the particular sciences and bodies of knowledge operating in functional separation cannot pose on their own especially when they take in a reductionist fashion their own object to be the prime analogate Metaphysics in fact insinuates itself into each and every particular science in exploring its own subject matter of being as being in the analogical sense advancing to more and more complex stages of analogy through dialogue among different spirits and cultures and reaching its terminus in the transcendent aspect of spirit and religion In this sense metaphysics has much to say to theologians without metaphysics theology reduces to mere superstition *Proceedings and Addresses of the American Philosophical Association* American Philosophical Association,2007 List of members in v 1 American Catholic Philosophical Quarterly ,2008 **Phenomenological Inquiry** ,2008 Comptes Rendus Philosophiques ,2007
