Poverty, Ethnicity, and Gender in Transitional Societies Iván Szelényi,2002 Both the extent and the character of poverty in Eastern Europe appear to have changed with the transition from socialism to a market economy There has been not only a substantial increase in the proportion of the population living in extreme poverty but according to some commentators the actual character of poverty has changed as well The conventional wisdom among social scientists is that during socialism poverty was mainly a life cycle phenomenon Thus families with large numbers of young children the temporarily or permanently disabled and the elderly tended to be poor Today however social class ethnicity and or gender appear to play a more significant role than in the past in terms of predicting or explaining poverty The surveys are based on statistical data generated by surveys conducted in the six post communist countries of Bulgaria Hungary Poland Romania Russia and Slovakia during the fall of 1999 and the winter and spring of 2000 The research team included a

Cultural Politics of Ethnicity Vera Sokolova,2008 This book maps out the history of Czechoslovak linguistic and social practices directed at Roma during the communist period It explains how contemporary Czech society has come to understand the Romani population in terms of inherited social medical and juridical ideas Rather than focusing on the Roma people as an object of analysis the book problematizes assumed notions of Gypsiness and Czechness in mainstream society by highlighting the role

of different socialist discourses in constructing images of Roma as socially deviant and abnormal. By uncovering the lines of continuity in the intersections of ethnic discrimination, social deviance and citizenship from the 1950s to the collapse of communism, this book comes to terms with a variety of questions that have not yet been adequately addressed in the literature. What underlying assumptions informed the socialist regime's understanding of Gypsiness and how did these conceptions relate to notions of citizenship, equality and normality? How and why did the meaning of the terms Gypsies and Roma become imbued in popular discourse with ideas of unhealthiness and social deviance? What implications does translating perceived cultural traits and lifestyles of Roma into non-ethnic frames of reference have for understanding racism and ethnic sensibilities in the country today? The work emphasizes historical continuities between contemporary xenophobia and the strategies which the communist regime used to deal with the Gypsy question. Focusing on the discrepancies between written laws and policies as well as their implementation, this study exposes the intricate relationships between official beliefs, institutional policies and popular consciousness under the communist regime. For it was these relationships which together created the mechanisms of social control that facilitated discrimination of Czechoslovak Roma under the guise of social welfare.
