Crowley,2016-10-26 This work unites the insights of Ebola's first responders with those the world's foremost experts in law economics vaccine development and global migration to identify missed opportunities from the Ebola crisis and to apply these lessons to emerging infectious disease threats

The Ebola Epidemic in West Africa National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Global Health, Forum on Microbial Threats,2016-12-30 The most recent Ebola epidemic that began in late 2013 alerted the entire world to the gaps in infectious disease emergency preparedness and response The regional outbreak that progressed to a significant public health emergency of international concern PHEIC in a matter of months killed 11 310 and infected more than 28 616 While this outbreak bears some unique distinctions to past outbreaks many characteristics remain the same and contributed to tragic loss of human life and unnecessary expenditure of capital insufficient knowledge of the disease its reservoirs and its transmission delayed prevention efforts and treatment poor control of the disease in

hospital settings and inadequate community and international responses Recognizing the opportunity to learn from the countless lessons of this epidemic the National Academies of Sciences Engineering and Medicine convened a workshop in March 2015 to discuss the challenges to successful outbreak responses at the scientific clinical and global health levels Workshop participants explored the epidemic from multiple perspectives identified important questions about Ebola that remained unanswered and sought to apply this understanding to the broad challenges posed by Ebola and other emerging pathogens to prevent the international community from being taken by surprise once again in the face of these threats This publication summarizes the presentations and discussions from the workshop *Emerging Communicable Diseases: Ebola* Emenike Muonanu,2020-06-24 Academic Paper from the year 2018 in the subject Health Miscellaneous grade na University of Western Sydney language English abstract Infectious diseases are a constant threat to human life Various scientific research findings since the 19th century have however paved the way for an improved comprehension of infectious diseases with regards to their natural history and the preventive measures to control them These measures include vector control immunisation and water treatment The implementation of these measures over the last century brought about huge victories for mankind in the battle to control infectious diseases A good example of such victories is the eradication of smallpox in the year 1979 In recent decades nonetheless the incidence of infectious diseases which were thought to be well controlled has increased in several locations across the world Antimicrobial resistance is also on the rise globally and diseases which were previously unknown to man have also emerged These issues have become global problems which require urgent assessment and resolution This essay is an in depth critical review of the literature on Ebola one of the emerging communicable diseases The essay will discuss the concept of disease emergence provide a brief history about the Ebola virus review the factors that have contributed to the emergence of Ebola infection discuss some of the current policies to control this disease and make recommendations on strategies to improve on the current Ebola control policies Human Diseases and Conditions ,2003 Presents articles dealing with all kinds of diseases and disorders from acne and brain tumor to tobacco related diseases and yellow fever General Science for Competitive Exams - SSC/ Banking/ Defence/ Railway/ Insurance - 2nd Edition Disha Experts,2020-02-29 The Ebola Crisis. An Overview Wasihun S. Gutema,2017-01-27 Seminar paper from the year 2016 in the subject Medicine History grade A course Independent Research 709 language English abstract This research paper explains what the Ebola Virus Diseases EVD is about and accounts of its history centering on policy and administrative measures to tackle the EVD In elucidating details of the EVD the research paper narrates aspects of when the virus was incepted in history and the origins of the virus It also assesses controversies behind the origin of the virus and gives a conclusion that wild animals of unspecified type are the origin Its origin is unspecified given the fact that various wild animals are considered to be the root causes either as a contact or as food resources Added the paper details how the Ebola Virus Diseases of 2014 expanded beyond geographical barriers and affected huge numbers of people breaking the overall

records in history and surpassing the overall past occurrences together in magnitude and scope The plague with such magnitude has shattered the capacity of Western African countries to contain it and put into question the ability of the world health organization WHO and the global community Be that as it may the collective participation of the global community has brought the plague into a defeat The plague has been contained with the diverse role played by the international community INGOs WHO the UN and the host West African countries of Guinea Liberia and Sierra Leone Guinea Liberia and Sierra Leone have used different administrative and policy mechanisms to contain the Ebola Virus Disease of the 2014 The 2014 Ebola Crisis could not have been contained without those administrative and policy addressees that the host countries have designed and implemented The UN WHO and INGOs have also collaborated in containing the plagues with diverse administrative and policy issues besides providing resources to avert the farther expansion of the plague and its huge impact on security in its border term among which failure of investing on health facilities in West Africa was unprecedented The research has finally drawn a recommendation and a conclusion

**Ebola's Evolution** Michael B. A. Oldstone, Madeleine Rose Oldstone, 2021-06-04 This book provides an intimate portrait of multiple outbreaks of Ebola in Africa and reveals how the results of that experience can help us fight COVID 19 Michael B A Oldstone who led the Viral Immunobiology Laboratory at the Scripps Research Institute worked with Ebola

teams up with Madeleine Rose Oldstone to give a detailed account of the 2013 2016 and 2018 2020 Ebola outbreaks The authors trace the origin of the disease its spread like a tsunami thru Guinea Sierra Leone and Liberia the collapse of economies and the development of anti viral therapies against Ebola They compare the outbreaks of one of the world s deadliest viruses with today s struggle to overcome the COVID 19 pandemic You will gain intimate knowledge of a deadly pathogen that devastated a region of the world that lacks resources to fight it and learn why the world was unprepared for the Ebola outbreak You will meet people who fought heroically with limited resources including Sheik Kahn who died fighting Ebola and was declared a national hero by the Sierra Leone government Pardis Sabeti a geneticist working in infectious diseases from Harvard and MIT who was named Scientist of the Year by Time magazine and Robert Garry who headed the fight against viral hemorrhagic diseases and kept the White House and the press informed Sabeti and Garry worked with Oldstone and provided information about the outbreak to the authors making the narrative particularly incisive and timely Ebola s Evolution will give you a fast paced detailed and fascinating picture of a feared disease that killed thousands of people and threatening to become a global pandemic before it was stopped Outbreak Culture Pardis Sabeti,Lara Salahi,2021-09-01 A Choice Outstanding Academic Title of the Year A critical poignant postmortem of the epidemic Washington Post Forceful and instructive Sabeti and Salahi uncover competition sabotage fear blame and disorganization bordering on chaos features that are seen in just about any lethal epidemic Paul Farmer cofounder of Partners in Health The central theme of the book is that common threads of dysfunction run through responses to epidemics The power of Outbreak Culture is its universality Nature Sabeti and Salahi present a wealth of evidence supporting the imperative that outbreak response must operate in a coordinated real time manner Science As we saw with the Ebola outbreak and the disastrous early handling of the COVID 19 coronavirus pandemic a lack of preparedness delays and system wide problems with the distribution of critical medical supplies can have deadly consequences Yet after every outbreak the systems put in place to coordinate emergency responses are generally dismantled One of America s top biomedical researchers Dr Pardis Sabeti and her Pulitzer Prize winning collaborator Lara Salahi argue that these problems are built into the ecosystem of our emergency responses With an understanding of the path of disease and insight into political psychology they show how secrecy competition and poor coordination plague nearly every major public health crisis and reveal how much more could be done to safeguard the well being of caregivers patients and vulnerable communities A work of fearless integrity and unassailable authority Outbreak Culture seeks to ensure that we make some urgently needed changes before the next pandemic

*Ebola: An Evolving Story* James Lyons-weiler,2015-05-27 Selected as CHOICE magazine s Outstanding Academic Title January 2017 The book is a narrative of the unfolding of the Ebola virus disease outbreak from a scientific view point The author provides an analysis of the scientific basis of public health policies that have influenced the public s and the medical community s abilities to understand the virus and the disease This is done in the context of providing insights into the biology

of the virus and exploring open questions including its likely modes of transmission The author has included citations from the scientific literature and the press as well as quotes from expert interviews The book will help sort out the fact from fiction given the confusion that arose after the virus arrived in the US The author used his objective research skills and knowledge of evolutionary genetics and molecular biology to find out what was known and what questions remained unanswered and even what questions remained unasked Written in an accessible style it is intended for the educated general public scientists policy makers health care workers and politicians It delves into the problems of trying to derive a logic based understanding of a highly lethal emerging disease in 2014 when research funding cuts have gutted research institutions and when public health institutions really were woefully unprepared It is a highly distinct narrative analysis that is sure to stimulate new research and thinking in public policy It will inform thousands of people of the nature of the virus how it works in terms they are likely to be able to understand It will allow others to rapidly catch up with the story of Ebola
