**Biocentrism and Modernism** Oliver A. I. Botar, 2017-07-05 Examining the complex intersections between art and scientific approaches to the natural world Biocentrism and Modernism reveals another side to the development of Modernism While many historians have framed this movement as being mechanistic and against nature the essays in this collection illuminate the role that nature centric ideologies played in late nineteenth to mid twentieth century Modernism The essays in Biocentrism and Modernism contend that it is no accident that Modernism arose at the same time as the field of modern biology From nineteenth century discoveries to the emergence of the current environmentalist movement during the 1960s artists architects and urban planners have responded to currents in the scientific world Sections of the volume treat both philosophic worldviews and their applications in theory historiography and urban design This collection also features specific case studies of individual artists including Raymond Duchamp Villon Paul Klee Wassily Kandinsky and Jackson Pollock

Paul Klee Paul Klee, 2013 A new retrospective survey that reveals the complexities of this popular artist best known for his playful and colorful aesthetic German Incertitudes, 1914-1945 Klemens von Klemperer, 2001-03-30 The history of modern Germany has all too readily been seen in terms of an historical process that inevitably led to the horrors of National Socialism As there are no certitudes in life however so there are none in German history In this book historian Klemens von Klemperer focuses on what he terms the German Incertitudes namely the tensions between a realistic acceptance of disenchantment with the modern world and an insistence upon reenchancement Exploring this tension through a critical assessment of the ideas and writings of major German thinkers von Klemperer seeks to account for both the achievements and the failings of German thought society and politics as responses to the challenge of modernity in the first half of the 20th century In addition to individuals such as Nietzsche Weber Spengler J nger Bonhoeffer and Heidegger the author considers

broader movements and ideas such as the concept of Gemeinschaft and the German expressionists all in the wider context of Western intellectual currents Rather than belaboring presumed German deviance from the European norms von Klemperer explores the reasons why the sense of crisis in the face of modernity was singularly acute among Germans he traces a spectrum of reactions extending from an acceptance of modern disenchantment to the quest for reenchantment which found an extreme manifestation in National Socialism

*Architectures of Transversality* Shima Mohajeri, 2018-07-11 Architectures of Transversality investigates the relationship between modernity space power and culture in Iran Focusing on Paul Klee's Persian inspired miniature series and Louis Kahn's unbuilt blueprint for a democratic public space in Tehran it traces the architectonics of the present as a way of moving beyond universalist and nationalist accounts of modernism Transversality is a form of spatial production and practice that addresses the three important questions of the self objects and power Using Deleuzian and Heideggerian theory the book introduces the practices of Klee and Kahn as transversal spatial responses to the dialectical tension between existential and political territories and in doing so situates the history of the silent unrepresented and the unbuilt constructed from the works of Klee and Kahn as a possible solution to the crisis of modernity and identity based politics in Iran
