flourish die off and are replaced by new species We learn from paleontology and archaeology that for 50 000 years human hunting mining and agriculture have changed many localities sometimes irrevocably But today Novacek insists our behavior endangers the entire global ecosystem And if we disregard through ignorance antipathy or apathy the theory of evolution that developed with our modern understanding of the Earth s past we not only impede enlightenment but threaten any practical strategy for our own survival The evolutionary future of the entire living planet depends on our understanding this
