Upshur, 2017-05-25 Excerpt from *The Disorders of Menstruation A Practical Treatise* To understand fully any derangement in the proper performance of the functions of the uterus it is essential to have clearly mapped out in our minds its anatomical relations. This is especially needful because a displacement or some pathological condition of some appendage may be the cause of the derangement which we are called on to relieve and it is easy to understand how if the physician be ignorant of the topography of the pelvic organs he may fall into error in his investigations into the cause and nature of the diseased condition.
