## **The Dynamics Of Self Efficacy Organizational Structure Leadership:**

**The Dynamics of Self-efficacy, Organizational Structure, & Leadership** Azadeh Golbanu,2015-08-12 The question this book attempts to answer How is self efficacy affected by organizational structure and the leadership style of one s supervisor Primarily focuses on corporate organizations although the premises in The Dynamics of Self Efficacy Organizational Structure Leadership apply to many other types of organizational structures This analysis within the field of synthesis is a brief introduction to group dynamics and enhancing personal control across all levels of social organizational design

**The Dynamics of Self-efficacy, Organizational Structure, and Leadership Style of Supervisors** Azadeh Hourmanesh Weber,2017 Self efficacy is a person s belief in one s ability to practice awareness acceptance and regulation of oneself and one s environment Self efficacy gives a person presence and an enhanced executive functioning to meet goals and influence results In an organizational work setting enhancing self efficacy among group members may contribute to an overall positive work experience as well as a strengthening of collective efficacy The leadership relational style that supports an organizational structure that values self efficacy is characterized by an awareness of power dynamics and a shared reality Centering power dynamics when discussing diversity and inclusion can undermine self determination when a concurrent discourse on self efficacy is lacking because it may choke out subjectivity Therefore the motivation to study employees at technology companies in Silicon Valley is aimed at understanding the narratives of members across levels of organizational design and how these narratives are construed with respect to self efficacy leadership relational styles of supervisors and organizational structure Different organizational structures and leadership relational styles are explored through narrative analysis aimed at understanding self efficacy of corporate workers One finding of the study is that employees experience corporate restructuring and leadership change to be difficult because one loses one s work history when one s leader leaves have to rebuild the supervisory relationship from scratch and are deprived of the decision to be part of the new team Employees who have more knowledge of the corporate changes ahead of time and who have more experience with corporate change tend to have an easier time during the transitions It is not uncommon for an organization to have corporate restructuring and leadership change in response to market position A second finding of the study was that convictions of ability determined accomplishment more than interest in a task and socioeconomic motivations This study seeks to understand the dynamics of self efficacy organizational structure and leadership style of one s supervisor through semistructured interviews and narrative analysis The implications of this study serve to bring awareness to organizational culture and identify the responsibility group members across levels of organizational design have in creating a value for self efficacy in corporate culture and self development abstract
