Kevin R. Cox

The Culture Of Time And Space 1880 1918:

The Culture of Time and Space, 1880-1918 Stephen Kern, 2003-11-30 Kern writes about sweeping changes in technology and culture between 1880 and World War I that created new modes of understanding and experiencing time and space To mark the book's 20th anniversary Kern provides a new preface about the breakthrough in interpretive approach that has made this a seminal work in interdisciplinary studies **The Culture of Time and Space 1880-1918** Stephen

Kern, 1983-01-01 The cultural historian Stephen Kern claims that a new way of experiencing and conceptualizing time and space emerged in Europe and in America from 1880 to the end of World War I and that this change is best understood in terms of the technological innovations in transportation and communication that occurred during this tumultuous period His primary concern is to document the existence of this transformation rather than to explain it and thus he seeks to establish patterns of coherence rather than lines of causation His goals are to demonstrate the novelty of these conceptualizations and to illustrate their universality by describing their manifestations in widely divergent areas of cultural life The result is a richly detailed and absorbing narrative that synthesizes major events innovations and ideas in a wide variety of fields including art literature politics science and technology From <http://www.jstor.org> Oct 9 2014 ~THEœ CULTURE OF TIME AND SPACE ~1880-1918œ (EIGHTEEN HUNDRED AND EIGHTY TO NINETEEN HUNDRED AND EIGHTEEN). Stephen Kern, 1983

The Culture of Time and Space 1880-1918 Stephen Kern, 2003 **Review Essay** Robert Wohl, *Time and Space in the Internet Age* Stephen Kern, 2024-08-01 This book analyzes how new technologies transformed life and thought between two periods 1880 1920 and 1980 2020 with a focus on temporal experiences of past present future and the spatial experiences of form distance and direction The signature contrast is between experiences of time and space transformed by the telephone in the earlier period and the Internet in the later period along with other sharp contrasts the sinking of the Lusitania in 1915 and the attack on the World Trade Center on 9 11 World War I and the Gulf Wars gravity bombs and smart bombs the pandemics of 1918 and 2020 assembly lines and flexible production Farmer's Almanacs and computer based weather predictions cash transactions and one click ordering decolonization and globalization internationalism and planetarity The book also makes three interpretive arguments the Epistemological Argument covers how greater knowledge introduced uncertainties the Ethical Argument tracks how new technologies prompted ethical judgments about their value and the Re hierarchizing Argument tracks the erosion of spatial hierarchies most notably in religion society and politics with the increasing progress of secularization social mobility and democratization *Time and Space in the Internet Age* is a thought provoking study for academics and general readers interested in the history of technology and science **Science, Time and Space in the Late Nineteenth-Century Periodical Press** James Mussell, 2017-05-15 James Mussell reads nineteenth century scientific debates in light of recent theoretical discussions of scientific writing to propose a new methodology for understanding the periodical press in terms of its movements in time and space That there is no disjunction between text and

object is already recognized in science studies Mussell argues however this principle should also be extended to our understanding of print culture within its cultural context He provides historical accounts of scientific controversy documents references to time and space in the periodical press and follows magazines and journals as they circulate through society to shed new light on the dissemination and distribution of periodicals authorship and textual authority and the role of mediation in material culture Well known writers like H G Wells and Arthur Conan Doyle are discovered in new contexts while other authors publishers editors and scientists are discussed for the first time Mussell is persuasive in showing how his methodology increases our understanding of the process of transformation and translation that underpins the production of print and informs current debates about the status of digital publication and the preservation of archival material in electronic forms Adding to the book s usefulness are an extended bibliography and a discussion of recent debates regarding digital publication

Postmodern Time and Space in Fiction and Theory Michael Kane, 2020-01-14 *Postmodern Time and Space in Fiction and Theory* seeks to place the contemporary transformation of notions of space and time often attributed to the technologies we use in the context of the ongoing transformations of modernity Bringing together examples of modern and contemporary fiction from Defoe to DeLillo *Frankenstein* to *Finnegans Wake* and theoretical discussions of the modern and the post modern the author explores the legacy of modern transformations of space and time under five headings The Space of Nature The Space of the City Postmodern or Most Modern Time The Time and Space of the Work of Art in the Age of Digital Reproduction and Travel from Modernity to These five essays re examine the meanings of modernity and its aftermath in relation to the spaces and times of the natural the urban and the media environment

Time, Space, and Society A. Kellerman, 2012-12-06 Time and space are two of the most basic dimensions of human life They envelop all human beings from birth to death As such they provide the context for human existence At the same time however time and space also serve as major influencing factors in mankind s actions Hence a vast literature has developed on time and space as separate dimensions and recently on time space as joint dimensions Interestingly enough the social connotations of time and space have mostly been studied with the individual human being in mind The more societal significance of time and space whether separately or jointly have been relatively neglected It is the purpose of this volume to help fill this lacuna through discussions on some of the many junctions of time space and society at large The discussion will naturally involve concepts and findings from more than just one discipline notably geography sociology social history and political science It is thus obvious that the topic may be highlighted from several perspectives Given my own education and work the approach will lean more to the geographical perspective Geography has a special merit as an integrating framework for the study of time space and society It is a discipline that has space at the center of its *raison d etre* and as such has always striven for integration holism and comprehensiveness
