## **The Demon In The Freezer A True Story:**

*The Demon in the Freezer* Richard Preston, 2003-08-26 The bard of biological weapons captures the drama of the front lines Richard Danzig former secretary of the navy The first major bioterror event in the United States the anthrax attacks in October 2001 was a clarion call for scientists who work with hot agents to find ways of protecting civilian populations against biological weapons In *The Demon in the Freezer* his first nonfiction book since *The Hot Zone* a 1 New York Times bestseller Richard Preston takes us into the heart of Usamriid the United States Army Medical Research Institute of Infectious Diseases at Fort Detrick Maryland once the headquarters of the U S biological weapons program and now the epicenter of national biodefense Peter Jahrling the top scientist at Usamriid a wry virologist who cut his teeth on Ebola one of the world s most lethal emerging viruses has ORCON security clearance that gives him access to top secret information on bioweapons His most urgent priority is to develop a drug that will take on smallpox and win Eradicated from the planet in 1979 in one of the great triumphs of modern science the smallpox virus now resides officially in only two high security freezers at the Centers for Disease Control in Atlanta and in Siberia at a Russian virology institute called Vector But the demon in the freezer has been set loose It is almost certain that illegal stocks are in the possession of hostile states including Iraq and North Korea Jahrling is haunted by the thought that biologists in secret labs are using genetic engineering to create a new superpox virus a smallpox resistant to all vaccines Usamriid went into a state of Delta Alert on September 11 and activated its emergency response teams when the first anthrax letters were opened in New York and Washington D C Preston reports in unprecedented detail on the government s response to the attacks and takes us into the ongoing FBI investigation His story is based on interviews with top level FBI agents and with Dr Steven Hatfill Jahrling is leading a team of scientists doing controversial experiments with live smallpox virus at CDC Preston takes us into the lab where Jahrling is reawakening smallpox and explains with cool and devastating precision what may be at stake if his last bold experiment fails **The**

**Demon in the Freezer** Richard Preston, 2003-01-06 In the aftermath of the 9 11 attacks in the USA the western world had to deal with a new threat bioterrorism In October 2001 a series of anthrax attacks through the postal system caused chaos and fear But there was a far greater danger that had government security advisers around the world even more alarmed smallpox In his terrifying account of what happened and what could still happen Richard Preston reveals the true horror faced by victims of smallpox raises serious questions about what happened to the smallpox viruses that were kept in storage after the disease was eradicated in 1979 and shows just how easy it would be to create new strains of smallpox that would be able to overcome any vaccination leaving the population defenceless **Reading, Writing, and Inquiry in the Science**

Coleman, 2007 In Eden's Garden Rethinking Sin and Evil in an Era of Scientific Promise Richard Coleman examines the notion of sin in a contemporary world that values scientific and nonreligious modes of thought regarding human behavior This work is not an anti science polemic but rather an argument to show how sin and evil can make sense to the nonreligious mind and how it is valuable to make sense of such phenomena Examining themes in religion philosophy and theology it is ideal for use in the numerous courses which move across these disciplines      *BMJ*, 2002      *Forensic Aspects of Chemical and Biological Terrorism* Cyril H. Wecht, 2004 As terrorists become more determined to cause chaos the possibility of them using chemical or biological weapons increases An attack of this nature in any country would pose a great danger to the entire world Modern technology has made it easier for terrorists to produce chemical and biological weapons for use in public areas In order to prevent attacks or contain the spread of disease or chemical exposure the response must be rapid organized and thorough Forensic Aspects of Biological and Chemical Terrorism is an eye opening resource for first responders health care professionals law enforcement agencies and government officials It provides valuable insight into what response areas need improvement and what responder roles should be It extensively covers the investigation of attacks from the signs and symptoms of diseases and chemical exposure to scene investigation This timely resource is a must have for anyone involved in public health and public safety      **Bulletin of the Atomic Scientists**, 2003      **Beating Back the Devil** Maryn

Goodsell, 2011 In an era filled with mistrust for big government and big business Charles Goodsell goes against this grain to draw attention to public agencies admired for what they do and how well they do it In his groundbreaking new book Goodsell places renewed focus on organizational mission and its potential to be a strong energizing force in government one that animates a workforce internally and attracts admiration and talent externally He offers a normative template for the mystique that underlies this phenomenon and highlights in six rich case studies a driving sense of purpose a cultural and motivational richness and a capacity for tolerating dissent while still innovating and learning Analyzing what works best and what doesn't Goodsell provides a metric through which agency mystique can be evaluated and modeled Goodsell's fresh take on public agencies not only defines good public administration in terms of ethical conduct constitutional accountability and performance effectiveness but argues that the field must add the crucial
