**The Devil's Poison** Dean Murphy DDS,2008-07-11 Fluoride and fluoridation will go down as one of the greatest controversies of the 20th century Up until the early 1940 s fluorine s effect on life was always deemed poisonous It was proven to be altering enzymes used by living organisms to carry out a multitude of essential processes Fluorine the most reactive element on the planet is also the strongest free radical Scientists in the 1930 s and 1940 s experimented with this element to create the most deadly nerve gasses rocket fuel and radioactive U235 for the bomb As a wood preservative rodenticide and insecticide fluorine compounds are second to none As an Orthodontist I began investigating the increasingly prevalent lines and spots that I saw on the enamel of children Like rings on a tree they indicate excessive fluorine exposure I started to ask the question How does fluorine cause these marks Chronic doses of fluoride like arsenic and lead accumulate in our bodies causing a blockage in the way cells breathe and leads to the malformation of collagen Cancer diabetes thyroid and neurological disorders hormonal imbalances heart disease arthritis and osteoporosis have all been linked to chronic fluoride ingestion We are now exposed to increasing doses of fluoride from toothpaste rinses water food medicines showering bathing and even the air that we breathe Our environment has become a literal fluoride dumping ground This book explores many chronic diseases that plague man today and looks at the scientists that connected these diseases to chronic exposures of fluoride

*THE COVID FIASCO* Hugh Cameron,2024-11-21 It is hard to believe that we are four years into one of the greatest man made tragedies the world has ever seen The data is now clear that the Wuhan virus posed no significant threat to any healthy person under age seventy that the government mandates such as lockdown were unnecessary anti scientific civilization damaging maneuvers and that the safe and effective needle was neither rendering infection more likely and producing serious side effects likely for years to come What is incomprehensible is that some of these measures continue

Barry Groves,2001-09-20 Fluoride is more toxic than lead yet it is routinely added to the drinking water of Ireland and Britain In *Fluoride Drinking Ourselves to Death* Barry Groves presents an array of convincing and persuasive arguments that dismantle the commonly held belief that the fluoridation of water is beneficial to our health The fluoridation of water has been used for the prevention of tooth decay for over fifty years During this time little research has been done to ascertain whether it works The chemicals used are classified as toxic industrial waste yet no study has ever been conducted into their safety for human consumption At the same time research has uncovered serious side effects including death cancer skeletal fluorosis osteoporosis dementia lowered IQ kidney damage and even increased dental decay Fluoride is only slightly less toxic than arsenic and all the evidence points incontrovertibly to the harm caused by fluoride to human plant and animal life Yet it is routinely added to the drinking water of five million people in Britain and more than two and a half million people in Ireland Strongly opposed throughout the world water fluoridation is far less widely accepted than its proponents would have us believe Only two percent of the people of Western Europe have their water fluoridated almost all of them within Britain and Ireland Despite this dental organisations lobby governments to compel everyone to ingest fluoride whether they want it or not and without regard to possible harm The vast majority of dentists maintain that the fluoridation of water is not debatable In this book Barry Groves assembles evidence to refute every single argument made by the dental establishment in favour of fluoridation This carefully researched and persuasively written book demonstrates that the case for fluoridation of water is based on poor science and dogmatic ignorance rather than on any scientifically proven benefit to public health His conclusions are truly alarming for everyone concerned with their own health that of their families and of society in general *Fluoride Drinking Ourselves to Death* Table of Contents Introduction Water Fluoridation Fluoride and Water Safety Cancer and Fluoride Safe Limit for Fluoride Research into Fluoride Fluoridation and High Infant Mortality Fluoride as a Cumulative Poison Fluoride Kills People at Risk from Fluoride EPA Scientists and Fluoride Support for Fluoridation Diminishes in America The Totality of Fluoride The Ethics and Legality of Fluoridation Dental Fluorosis The Dose Makes the Poison Fluoride Related Bone Problems Part

R. Walker, 1982 An indictment of the Victorian Government Committee of Inquiry Melbourne 1979 1980 into the Fluoridation of Victorian Water Supplies      The Case against Fluoride Paul Connett, James Beck, Spedding Micklem, 2010-10-07 National Health Information Award At once painstakingly documented and also highly readable The Case Against Fluoride brings new research to light it explores the poor science bizarre tactics biased reviews and puzzling motivations of a relatively small number of influential people who continue to push this practice on a largely ill informed public American Academy of Environmental Medicine Newsletter When the U S Public Health Service endorsed water fluoridation in 1950 there was little evidence of its safety Now six decades later and after most countries have rejected the practice more than 70 percent of Americans as well as 200 million people worldwide are drinking fluoridated water The Center for Disease Control and the American Dental Association continue to promote it and even mandatory statewide water fluoridation despite increasing evidence that it is not only unnecessary but potentially hazardous to human health In this timely and important book Dr Paul Connett Dr James Beck and Dr H Spedding Micklem take a new look at the science behind water fluoridation and argue that just because the dental and medical establishments endorse a public health measure doesn't mean it's safe In the case of water fluoridation the chemicals that go into the drinking water that more than 180 million people drink each day are not even pharmaceutical grade but rather a hazardous waste product of the phosphate fertilizer industry It is illegal to dump this waste into the sea or local surface water and yet it is allowed in our drinking water To make matters worse this program receives no oversight from the Food and Drug Administration and the Environmental Protection Agency takes no responsibility for the practice And from an ethical standpoint say the authors water fluoridation is a bad medical practice individuals are being forced to take medication without their informed consent there is no control over the dose and no monitoring of possible side effects Alfred North Whitehead said the scientific method means leaving options open for revision An ancient Roman adage says that whatever touches all must be approved by all These characterizations of science and democracy are the reasons for reading this book Especially if you and your family are drinking administratively mandated fluoridated water Ralph Nader

**Fluoridation** George L. Waldbott, Albert W. Burgstahler, Henry Lewis McKinney, 1978      *The Fluoride Wars* R. Allan Freeze, Jay H. Lehr, 2009-04-29 A lively account of fluoridation and its discontents Since its first implementation in Grand Rapids Michigan in 1945 public drinking water fluoridation and its attendant conflicts controversies and conspiracy theories serve as an object lesson in American science public health and policymaking In addition to the arguments on the issue still

raging today the tale of fluoridation and its discontents also resonates with such present concerns as genetically modified foods global warming response nuclear power and environmental regulation Offering the best current thinking on the issue The Fluoride Wars presents a witty and detailed social history of the fluoridation debate in America illuminating the intersection of science and politics in our recent past This reader friendly assessment explores the pro and anti fluoridation movements key players and important events Full of amusing and vivid anecdotes and examples this accessible recounting includes A careful and non condescending look at the hard science popular science pseudo science and junk science involved A look at fluoride issues including dosage cost financial and funding interests fluorosis and problems of risk cost benefit analysis The back and forth drama between pro and anti fluoridation factions with all its claims counterclaims insults acrimony and lawsuits Case studies of various cities and their experiences with municipal water fluoridation initiatives Fluorophobia and popular conspiracy theories involving fluoride The colorful characters in the debate including activists scientists magicians and politicians A richly and considerately told tale of American science and public life The Fluoride Wars offers an engrossing history to both interested general readers and specialists in public health dentistry policymaking and related fields     *Fluoride, the Aging Factor* John Yiamouyiannis,1993
