The Difference That Disability Makes:

The Difference that Disability Makes Rod Michalko, 2002 Rod Michalko launches into this book asking why disabled people are still feared still regarded as useless or unfit to live not yet welcome in society Michalko challenges us to come to grips with the social meanings attached to disability and the body that is not normal Michalko's analysis draws from his own understanding of blindness and narratives by other disabled people Connecting lived experience with social theory he shows the consistent exclusion of disabled people from the common understandings of humanity and what constitutes the good life He offers new insight into what suffering a disability means to individuals as well as to the polity as a whole He shows how disability can teach society about itself about its determination of what is normal and who belongs Guiding us to a new understanding of how disability difference and suffering are related this book enables us to choose disability as a social identity and a collective political issue The difference that disability makes can be valuable and worthwhile but only if we choose to make it so Author note Rod Michalko is Associate Professor of Sociology at St Francis Xavier University He is the author of *The Mystery of the Eye and the Shadow of Blindness* 1998 and *The Two in One Walking with Smokie Walking with Blindness* Temple 1999

Shakespeare and Disability Theory Genevieve Love, 2025-10-16 Shakespeare and Disability Theory serves as a guide to the intersections of Shakespeare studies and disability studies Intervening in contemporary critical debates about recognizing disability representations in dramatic texts Genevieve Love explores the stakes of embodying disability in Shakespearean performance After tracking the emergence of critical disability studies as a field Love maps out how claims from disability theory influence and continue to transform Shakespeare studies Through methodologies of literary disability studies the volume provides fresh readings of a range of Shakespeare texts illustrating the power of disability theory to reframe familiar ideas in Shakespeare and to illuminate unfamiliar ones While the archetypal Richard III provides an extended case study that highlights performance choices by disabled actors and contemporary appropriations of disability Love's close readings move beyond Shakespeare's representations of singular disabled characters Plays such as *Julius Caesar* and *King Lear* display the expansive networks through which we recognize Shakespearean disability including neurodiversity Subsequent chapters underscore disability's intersectionality recognized through dynamics of incorporation care and community in *Othello* and *Henry V* and demonstrate how plays such as *The Tempest* and *Titus Andronicus* mobilize disability as a resource for theatricality through stage properties and theatrical prostheses All these approaches point to engagements with literary and theatrical disability representations that challenge outmoded methods for Shakespeare students scholars and practitioners

A Historical Sociology of Disability Bill Hughes, 2019-09-26 Covering the period from Antiquity to Early Modernity *A Historical Sociology of Disability* argues that disabled people have been treated in Western society as good to mistreat and with the rise of Christianity good to be good to It examines the place and role of disabled people in the moral economy of the successive cultures that have constituted Western civilisation This book is the story of

disability as it is imagined and re imagined through the cultural lens of ableism It is a story of invalidation of the material habituations of culture and moral sentiment that paint pictures of disability as what not to be The author examines the forces of moral regulation that fall violently in behind the dehumanising ontological fait accompli of disability invalidation and explores the ways in which the normative community conceived of narrated and acted in relation to disability A Historical Sociology of Disability will be of interest to all scholars students and activists working in the field of Disability Studies as well as sociology education philosophy theology and history It will appeal to anyone who is interested in the past present and future of the last civil rights movement

Disability in the Global Sport Arena Jill M. Le Clair, 2013-09-13 Sport is often at the centre of battles for rights to inclusion linked to class race and gender and this book explores struggles centred on disability in different cultural settings in Europe North America Africa Asia and Oceania It challenges oversights and assumptions about the normal body and describes how individual and organizational transformations can occur through sport The abilities of a person are recognised and placed centre stage instead of the individual being forgotten excluded or placed at the margins simply because they have a disability National regional and global change is part of the shift to the rights based approach reflected in the 2006 UN Convention on the Rights of Persons with Disabilities Making sport inclusive affects the accessibility of facilities funding the media policies programs organisations sponsors and spectators and at the same time changes the cultural values of the wider society It also raises issues about competition access and eligibility for different and technologically enhanced cyborg bodies and for those most socially disadvantaged Addressing these questions which ultimately touch on the real meaning of sport can lead to profound changes in people's attitudes and how sport is organized locally and globally Growth in the influential global organisations of the Paralympic Games Special Olympics and Deaflympics is examined as is the approach to disability in sport in both advantaged and resource poor countries The embodied lives of persons with disabilities are explored utilizing new theoretical models perspectives and approaches This book was previously published as a special issue of Sport in Society

Levine, 1988 *Disability and Political Representation* Elizabeth Evans, Stefanie Reher, 2024-03-15 Disability and Political Representation explores how disabled people experience the various stages and aspects of the representation process drawing upon extensive empirical research and a variety of qualitative and quantitative data It discusses why increasing the number of disabled politicians matters not only as a matter of justice and equality but also to better represent the issues and interests of importance to disabled people Evans and Reher identify a variety of ableist barriers prevent disabled people from fully participating in the political process

from disenfranchisement and inaccessible polling stations to prejudice within parties and a lack of financial support for candidates who require adjustments The work shows that while the preferences of disabled citizens are currently under represented in parliament disabled representatives often draw on their lived experience to advocate for their interests The concept of experiential representation is developed to help scholars and practitioners better navigate the concept of political representation specifically as it relates to disability Thus the book explores how disability can help us think about the contours of political representation It presents and analyses a range of diverse and original data including qualitative data generated from interviews with disabled politicians and activists in the UK quantitative survey data on the political attitudes and participation of disabled citizens from across Europe and data from survey experiments examining voter perceptions of disabled politicians in the UK and the US
