IMF Staff Papers, Volume 56, No. 2 International Monetary Fund. Research Dept.,2009-06-03 China's growth performance since the start of economic reforms in 1978 has been impressive but the gains have not been distributed equally across provinces We use a nonparametric approach to analyze the variation in labor productivity growth across China's provinces This approach imposes less structure on the data than the standard growth accounting framework and allows for a breakdown of labor productivity into efficiency gains technological progress and capital deepening We have the following results First we find that on average capital deepening accounts for about 75 percent of total labor productivity growth while efficiency and technological improvements account for about 7 and 18 percent respectively Second technical change is not neutral Third whereas improvement in efficiency contributes to convergence in labor productivity between provinces technical change contributes to productivity disparity across provinces Finally we find that foreign direct investment has a positive and significant effect on efficiency growth and technical progress

The Dominican Republic Jimmy McHugh,P. Isard,VÁRIOS AUTORES,Philip M. Young,Jaime Cardoso,David Dunn,International Monetary Fund Staff,Alessandro Giustiniani,Werner Keller,Francisco Nadal-De Simone,John Panzer,Randa Sab,Soto. Raimundo,Evan Tanner,2001 This report presents a number of papers that consider the efforts made to achieve stabilisation structural reform and growth in the economy of the Dominican Republic during the 1980's and 1990's Issues discussed include trade reforms external debt restructuring fiscal policy and macroeconomic stability sources of economic growth and the free trade zones monetary policy exchange rates and interest rates

Dominican Republic Ms.Svetlana Cerovic,Jose Saboin,2016-10-17 This paper examines the financial position of the key sectors of the Dominican Republic It contributes to macroeconomic surveillance by identifying financial interlinkages and vulnerabilities through the balance sheet approach The balance sheet of the economy has been weakening particularly in foreign currency due to persistent fiscal deficits Risks arising from weaker foreign currency position however seem to be mitigated by long term maturities on government debt and increasing accumulation of foreign currency assets Given the strong links of the rest of the economy with the public sector network analysis suggests that while the financial position of the other sectors of the economy is stronger they could be adversely affected in an external stress scenario Exposures to public sector are particularly pronounced in the domestic financial system directly and households indirectly through pension funds

Congress. House. Committee on Financial Services. Subcommittee on International Monetary Policy and Trade, 2010 **Growth in the Dominican Republic and Haiti** Laura Jaramillo, Cemile Sancak, 2007-03 The Dominican Republic and Haiti share the island of Hispaniola and are broadly similar in terms of geography and historical institutions yet their growth performance has diverged remarkably The countries had the same per capita real GDP in 1960 but by 2005 the Dominican Republic's per capita real GDP had tripled whereas that of Haiti had halved Drawing on the growth literature the paper explains this divergence through a combined approach that includes a panel regression to study growth determinants across a broad group of countries and a case study framework to better understand the specific policy decisions and external conditions that have shaped economic outcomes in the Dominican Republic and Haiti The paper finds that initial conditions cannot fully explain the growth divergence but rather policy decisions have played a central role in the growth trends of the two countries This Working Paper should not be reported as representing the views of the IMF The views expressed in this Working Paper are those of the author s and do not necessarily

represent those of the IMF or IMF policy Working Papers describe research in progress by the author s and are published to elicit comments and to further debate *Reviews of National Policies for Education: Higher Education in the Dominican Republic 2012* OECD,2012-07-30 This OECD report provides an analysis of the higher education sector within the economic social and political context of the Dominican Republic It looks at access quality and relevance the effectiveness and governance of the system its financing as well as its research and innovation capacity The Macroeconomy of Central America R.
