## **The Early Modern City 1450-1750 A History Of Urban Society In Europe:**

The Early Modern City 1450-1750 Christopher R. Friedrichs, 2014-06-06 A pioneering text which covers the urban society of early modern Europe as a whole Challenges the usual emphasis on regional diversity by stressing the extent to which cities across Europe shared a common urban civilization whose major features remained remarkably constant throughout the period After outlining the physical political religious economic and demographic parameters of urban life the author vividly depicts the everyday routines of city life and shows how pitifully vulnerable city dwellers were to disasters epidemics warfare and internal strife

*Urban Societies in East-Central Europe, 1500-1700* Jaroslav Miller, 2016-02-11 Whilst much has been written about early modern urban history the majority of this work has focussed on Western Europe with relatively little available in English on towns and cities in the former communist East However in recent years urban scholars have

increasingly looked to a much more inclusive picture of Europe that compares and contrasts development across the whole continent Dealing primarily with Bohemia Hungary and the Polish Lithuanian Commonwealth this book provides an insight into a number of key issues concerning the economic social and demographic trends in early modern East Central European urban history Taking a supra national perspective across a long time span it examines the effects of migration Reformation state building and economic change on the transformation of medieval urban communities into early modern societies

Drawing on a wealth of primary sources particularly the registers of new citizens kept by many towns and cities a fascinating picture of urban development and social structure is reconstructed that not only tells us much about East Central Europe but adds to our knowledge of the whole continent

*Handbook of Contemporary European Social Theory* Gerard Delanty, 2006-09-27 This innovative publication maps out the broad and interdisciplinary field of contemporary European social theory It covers sociological theory the wider theoretical traditions in the social sciences including cultural and political theory anthropological theory social philosophy and social thought in the broadest sense of the term This volume surveys the classical heritage the major national traditions and the fate of social theory in a post national and post disciplinary era It also identifies what is distinctive about European social theory in terms of themes and traditions It is divided into five parts disciplinary traditions national traditions major schools key themes and the reception of European social theory in American and Asia Thirty five contributors from nineteen countries across Europe Russia the Americas and Asian Pacific have been commissioned to utilize the most up to date research available to provide a critical international analysis of their area of expertise Overall this is an indispensable book for students teachers and researchers in sociology cultural studies politics philosophy and human geography and will set the tone for future research in the social sciences

The Artisan and the European Town, 1500-1900 Geoffrey Crossick, 2016-12-05 Artisans played a central role in the European town as it developed from the Middle Ages onwards Their workshops were at the heart of productive activity their guilds were often central to the political and legal order of towns and their culture helped shape civic ritual and the urban

order These essays which have all been specially written for this collection explore the relationships between artisans and their towns across Europe between the beginning of the early modern period and the end of the 19th century They pay special attention to the processes of economic juridical and political change that have made the 18th and early 19th centuries a period of such significance Written by leading historians of European artisans the essays question the myths about artisans that have long pervaded research in the field The leading myth was that shared by the artisans themselves the myth of decline and the belief in each generation that artisans in the past had inhabited a better age These essays open up for debate the nature of artisanship the way economic change affected craft production the political role of artisans the cultural identification of the artisans with work and masculinity and the way changing urban society and changing urban structure posed threats to which the artisans had to respond Personal Agency at the Swedish Age of Greatness

1560-1720 Petri Karonen,Marko Hakanen,2017-12-08 Internationally the case of early modern Sweden is noteworthy because the state building process transformed a locally dispersed and sparsely populated area into a strongly centralized absolute monarchy and European empire at the beginning of the 17th century This anthology provides fresh insights into the state building process in Sweden During this transitional period many far reaching administrative reforms were carried out and the Swedish state developed into a prime example of the early modern powerstate The contributors approach Sweden's rise to greatness from the point of view of personal agency In early modern studies agency has long remained in the shadow of the study of structures and institutions This novel approach enables us to expose the difficulties setbacks and false steps that the administration had to deal with State building was a more diversified and personalized process than has previously been assumed Numerous individuals were also crucially important actors in the process and that development itself was not straightforward progression at the macro level but was intertwined with lower level actors Each chapter in this volume employs partially different methods depending on the source material and subject This means that both qualitative and quantitative material is combined different ways of making sense of it i.e research traditions are brought together and a multi method design is used in analyzing source material One of the central methods is the systematic use of previous biographical research We want to give the individuals and their actions under discussion a background that reflects the contemporary structures of individual life cycles With the existing biographical research it is possible to create a comprehensive set of data that provides the general outlines of individual lives or the career tracks of various estates or social groups and even to construct collective biographies of certain groups Augsburg During the Reformation Era B. Ann Tlusty,2012-09-15 Sixteenth century Augsburg comes to life in this beautifully chosen and elegantly translated selection of original documents Ranging across the whole panoply of social activity from the legislative reformation to work recreation and family life these extracts make plain the subtle system of checks and balances violence and self regulation that brought order and vibrancy to a sophisticated city community Most of all we hear sixteenth century people speak in their petitions

and complaints their nervous responses under interrogation their rage and laughter Tlusty has done an invaluable service in crafting a collection that should be an indispensable part of the teaching syllabus Andrew Pettegree University of St Andrews
