Ways of the World Laura J. Rosenthal,2020-11-15 Ways of the World explores cosmopolitanism as it emerged during the Restoration and the role theater played in both memorializing and satirizing its implications and consequences Rooted in the Stuart ambition to raise the status of England through two crucial investments global traffic including the slave trade and cultural sophistication this intensified global orientation led to the creation of global mercantile networks and to the rise of an urban British elite who drank Ethiopian coffee out of Asian porcelain at Ottoman inspired coffeehouses Restoration drama exposed cosmopolitanism s most embarrassing and troubling aspects with such writers as Joseph Addison Aphra Behn John Dryden and William Wycherley dramatizing the emotional and ethical dilemmas that imperial and commercial expansion brought to light Altering standard narratives about Restoration drama Laura J Rosenthal shows how the reinvention of theater in this period including technical innovations and the introduction of female performers helped make possible performances that held the actions of the nation up for scrutiny simultaneously indulging and ridiculing the violence and exploitation being perpetuated In doing so Ways of the World reveals an otherwise elusive consistency between Restoration genres comedy tragedy heroic plays and tragicomedy disrupts conventional understandings of the rise and reception of early capitalism and offers a fresh perspective on theatrical culture in the context of the shifting political realities of seventeenth and eighteenth century Britain

Global Byzantium Leslie Brubaker,Rebecca Darley,Daniel Reynolds,2022-07-29 Global Byzantium is in part a recasting and expansion of the old Byzantium and its neighbours theme with however a methodological twist away from the resolutely political and toward the cultural and economic A second thing that Global Byzantium as a concept explicitly endorses is comparative methodology

Global Byzantium needs also to address three further issues cultural capital the importance of the local and the empire s strategic geographical location Cultural capital in past decades it was fashionable to define Byzantium as culturally superior to western Christian Europe and Byzantine influence was a key concept especially in art historical circles This concept has been increasingly criticised and what we now see emerging is a comparative methodology that relies on the concept of competitive sharing not blind copying but rather competitive appropriation The importance of the local is equally critical We need to talk more about what the Byzantines saw when they looked out and what others saw in Byzantium when they looked in and to think about how that impacted on our very post modern concepts of globalism Finally we need to think about the empire s strategic geographical position between the fourth and the thirteenth centuries if anyone was travelling internationally they had to travel across or along the coasts of the Byzantine Empire Byzantium was thus a crucial intermediary for good or for ill between Europe Africa and Asia effectively the glue that held the Christian world together and it was also a critical transit point between the various Islamic polities and the Christian world Imagining Hinduism Sharada Sugirtharajah,2004-02-24 Imagining Hinduism is an indispensable guide to an immensely significant new understanding of the Hindu faith that it exists largely as a construct of the Western imagination **House Beautiful** ,1926

Pacific Voyages William Napier,John Gilbert,Julian Holland,1973 **The illustrated history of the British empire in India and the East ... to the suppression of the Sepoy mutiny in 1859. With a continuation [by another author] to the end of 1878** Edward Henry Nolan,1878 **Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures** Helaine Selin,2008-03-12 Here at last is the massively updated and augmented second edition of this landmark encyclopedia It contains approximately 1000 entries dealing in depth with the history of the scientific technological and medical accomplishments of cultures outside of the United States and Europe The entries consist of fully updated articles together with hundreds of entirely new topics This unique reference work includes intercultural articles on broad topics such as mathematics and astronomy as well as thoughtful philosophical articles on concepts and ideas related to the study of non Western Science such as rationality objectivity and method You ll also find material on religion and science East and West and magic and science **Ancient Food Trade** Dylan Wright,AI,2025-03-11 Ancient Food Trade explores how the exchange of food transformed ancient civilizations shaping culinary traditions and laying the groundwork for today s global cuisines It examines the origins and routes of ancient food trade the impact on regional cuisines and the social and economic effects of controlling essential food resources Intriguingly the book highlights how food systems are deeply intertwined with cultural identity and economic power For example the spice trade wasn t just about flavor it often dictated political alliances and economic dominance The book progresses by first establishing the fundamentals of ancient trade routes and agricultural practices It then investigates the growth of trade networks in Mesopotamia the Mediterranean and East Asia detailing the specific goods traded and their cultural impacts It draws upon archaeological findings ancient texts

and archaeobotanical studies to support its arguments The book differentiates itself by integrating archaeological textual and scientific data to provide a comprehensive understanding of ancient food systems offering a nuanced view beyond a simple list of traded goods

The World's Great Archaeological Treasures Paul G. Bahn, 1999 The treasures described and analyzed here come from a wide range of different contexts in terms of geography and culture as well as historic or prehistoric period The treasures range from Ice Age figurines of central and eastern Europe to African gold from the Dead Sea Scrolls to the sensational discoveries of Egyptologist in the tomb of Tutankhamen Many of the most well known treasure troves were originally put together as burial furnishings and for this reason they tell us much of what our forebears believed about death and the afterlife and how provision was made for the wellbeing of the dead in their journey onwards

Great Britain and the East, 1925 Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi
