

INTRODUCTION

The Rubik's Cube is solved **Layer by Layer** in the following order:

1. First Layer Cross
2. First Layer Corners
3. Middle Layer Edges
4. Last Layer Cross
5. Last Layer Corners

holding Your Cube:

Hold the Rubik's cube in what is called the "home grip". This grip allows you to easily rotate the left and right faces using your wrists, or the upper and bottom faces using your index and ring or pinkie fingers, respectively.

The front face can be rotated with thumbs, but this is an advanced technique.

This technique will help you to perform the sequence of moves (algorithm) without rotating the cube during the algorithm.

Notation:

In this solution guide, we have made sequence diagrams. These must be read from left to right. Understanding the effect of the move sequence on pieces to be relocated is important.
