## **The Day After Tomorrow Images Of Our Earth In Crisis:**

**The day after tomorrow** J. Henry Fair, 2010      **Anglophone Literature and Culture in the Anthropocene** Gina Comos, Caroline Rosenthal, 2019-05-02 Defined as an ecological epoch in which humans have the most impact on the environment the Anthropocene poses challenging questions to literary and cultural studies If in the Anthropocene the distinction between nature and culture increasingly collapses we have to rethink our division between historiography and natural history as well as notions of the subject and of agency since the Enlightenment This anthology collects papers from literary and cultural studies that address various issues surrounding the topic Even though the new epoch seems to require a collective self understanding as a unified species readings of the Anthropocene and conceptualizations of human nature relationships largely differ in Anglophone literatures and cultures These differing perspectives are reflected in the structure of this book which is divided into five separate sections the introductory part familiarizes the reader with the concept and the challenges it poses for the humanities in general and for literary and cultural studies in particular and the three following sections combine broader more theoretical essays with in depth critical readings of US Canadian and Australian representations of the Anthropocene in literature The final part moves beyond literature to include media theoretical perspectives and discussions of photography and cinema in the Anthropocene      Free Radicals Michael Brooks, 2012-04-26 An exuberant tour through the world of scientists behaving badly The New York Times They may have a public image as cool logical levelheaded types But in reality scientists will do pretty much anything take drugs follow mystical visions lie and even cheat to make a discovery In Free Radicals physicist and journalist Michael Brooks seamlessly weaves together true stories of the mad bad and dangerous men and women who have revolutionized the scientific world and offers a fast paced and thrilling exploration of the real process behind discovery The Times London Brooks also traces the cover up back to its source the scientific establishment s reaction to the public fear of science after World War II He argues that it is high time for science to come clean about just how bold and daring scientists really are Not all scientists are nerds In Free Radicals physicist Michael Brooks tries to dispel the notion that scientists are stuffy pen protector polishing bookworms The Washington Post Insightful A page turning unvarnished look at the all too human side of science Kirkus Reviews

**Industrial Heritage Re-tooled** James Douet, 2016-07 This book comprises the authoritative work from the International Committee for the Conservation of the Industrial Heritage detailing the latest approaches to and the best practices for the conservation of the global industrial heritage      Postdigital Aesthetics D. Berry, M. Dieter, 2015-05-26 Postdigital Aesthetics is a contribution to questions raised by our newly computational everyday lives and the aesthetics which reflect both the postdigital nature of this age but also critical perspectives of a post internet world      **Culture, Environment and Ecopolitics** Nick Heffernan, David A. Wragg, 2020-05-15 Culture Environment and Ecopolitics brings together a series of new reflections on historical and current ecological and environmental predicaments By way of critical interventions in

environmental thought and through engagements with literary visual architectural philosophical and more general cultural studies scholarship this collection of essays by an international panel of writers breaks new interpretative ground While techno science has in some quarters been elevated to a master discourse of humanity's salvation charged with providing a magical fix for planetary ecological dilemmas the focus of our volume is on the importance of cultural reflection for bringing matters of local and global import to light Moving from the abstractions of eco critical utopianisms to the concrete identity of the land in the poetry of John Clare from British Petroleum's attempts to re brand climate change to examples of eco architecture and much more besides these essays exemplify ways in which eco political thought and practice might now be theorized The collection is framed by a substantial editors introduction which offers but one contextualization of the ideas and critical trajectories that follow Culture Environment and Ecopolitics will allow readers to discover original intersections and argumentative cross references across contested terrains in a world increasingly troubled by ecological crises
