*Science and Civilisation in China: Volume 2, History of Scientific Thought* Joseph Needham,Ling Wang,1956-01-03 The second volume of Dr Joseph Needham's great work Science and Civilisation in China is devoted to the history of scientific thought Beginning with ancient times it describes the Confucian milieu in which arose the organic naturalism of the great Taoist school the scientific philosophy of the Mohists and Logicians and the quantitative materialism of the Legalists Thus we are brought on to the fundamental ideas which dominated scientific thinking in the Chinese middle ages The author opens his discussion by considering the remote and pictographic origins of words fundamental in scientific discourse and then sets forth the influential doctrines of the Two Forces and the Five Elements Subsequently he writes of the important sceptical tradition the effects of Buddhist thought and the Neo Confucian climax of Chinese naturalism Last comes a discussion of the conception of Laws of Nature in China and the West

Chinese Journal of Physics ,1997 The National Review, China ,1915 The New Werner Twentieth Century Edition of the Encyclopaedia Britannica ,1906 Why Fiction Matters in Contemporary China David Der-wei Wang,Dewei Wang,2020-11-14 Contemporary discussions of China tend to focus on politics and economics giving Chinese culture little if any attention Why Fiction Matters in Contemporary China offers a corrective revealing the crucial role that fiction plays in helping contemporary Chinese citizens understand themselves and their nation Where history fails to address the consequences of man made and natural atrocities David Der-wei Wang argues fiction arises to bear witness to the immemorial and unforeseeable Beginning by examining President Xi Jinping's call in 2013

to tell the good China story Wang illuminates how contemporary Chinese cultural politics have taken a fictional turn which can trace its genealogy to early modern times He does so by addressing a series of discourses by critics within China including Liang Qichao Lu Xun and Shen Congwen as well as critics from the West such as Arendt Benjamin and Deleuze Wang highlights the variety and vitality of fictional works from China as well as the larger Sinophone world ranging from science fiction to political allegory erotic escapade to utopia and dystopia The result is an insightful account of contemporary China one that affords countless new insights and avenues for understanding

**and the Philosophy of Life** Gavin Flood,2019-02-14 Religion and the Philosophy of Life considers how religion as the source of civilization transforms the fundamental bio sociology of humans through language and the somatic exploration of religious ritual and prayer Gavin Flood offers an integrative account of the nature of the human based on what contemporary scientists tell us especially evolutionary science and social neuroscience as well as through the history of civilizations Part one contemplates fundamental questions and assumptions what the current state of knowledge is concerning life itself what the philosophical issues are in that understanding and how we can explain religion as the driving force of civilizations in the context of human development within an evolutionary perspective It also addresses the question of the emergence of religion and presents a related study of sacrifice as fundamental to religions views about life and its transformation Part two offers a reading of religions in three civilizational blocks India China and Europe the Middle East particularly as they came to formation in the medieval period It traces the history of how these civilizations have thematised the idea of life itself Part three then takes up the idea of a life force in part three and traces the theme of the philosophy of life through to modern times On the one hand the book presents a narrative account of life itself through the history of civilizations and on the other presents an explanation of that narrative in terms of life
