## **The Dynamics Of Symbols Fundamentals Of Jungian Psychotherapy Fromm Psychology:**

The Dynamics of Symbols Verena Kast,1992 According to Carl Jung the goal of human life is self realization we have to strive to become whole Deep down we are all creative beings and we have to make use of our creativity to become what we really are Kast explores Jung s concept of the human being and describes the path to wholeness which since Jung is known as the individuation process It becomes clear that wholeness is only possible through the interplay between conscious and unconscious However the two have different languages consciousness uses word logic whereas the unconscious uses dream logic Both languages would be forever foreign to each other were it not for symbols which mediate between the two our unconscious encodes its knowledge in symbols which we then have to translate into the language of our consciousness Thus symbols are focal points of psychic development and it is through them that we can become whole human beings Jung taught us the techniques with which we can make the creative core of the unconscious available to consciousness Kast explains them by using numerous examples from her daily work as a therapist She shows us how psychological problems can be overcome by working on the symbols in which they express themselves In a language that can be readily grasped by the general reader Kast goes on to explain the basic thought of Jungian psychotherapy covering the correlation between symbols and complexes with a special emphasis on the ego complex the healing function of the archetypes and how they appear in and interact with symbols and symbols in transference and countertransference powerful tools in psychotherapy Kast also discusses the interplay of psychosomatic diseases and symbols The Dynamics of Symbols is not only of immediate interest to all psychologists and their patients It is of direct concern to everyone who has the desire to become a whole human being
