## **The Earth Charter Ecological Integrity And Social Movements:**

*The Earth Charter, Ecological Integrity and Social Movements* Laura Westra,Mirian Vilela,2014-06-20 The Earth Charter is a declaration of fundamental ethical principles for building a just sustainable and peaceful global society with ecological integrity as a major theme This book provides a series of analyses of ecological integrity as it relates to the Earth Charter social movements and international law for human rights It is shown how the Earth Charter project began as a United Nations initiative but it was carried forward and completed by a global civil society initiative The drafting of the Earth Charter involved the most inclusive and participatory process of its time ever associated with the creation of an international declaration This process is the primary source of its legitimacy as a guiding ethical framework The Earth Charter was finalized and then launched in 2000 and its legitimacy has been further enhanced by its endorsement by over 6 500 organizations including many governments and international organizations In the light of this legitimacy an increasing number of international lawyers recognize that the Earth Charter is acquiring the status of a soft law document The book also shows the strong connection between ecological integrity and social justice particularly in the defence of indigenous people and includes contributions from both the North and the global South specifically from Central and South America

[Ecological Integrity, Law and Governance](#) Laura Westra,Klaus Bosselmann,Janice Gray,Kathryn Gwiazdon,2018-04-27 Ecological integrity is concerned with protecting the planet in a holistic way while respecting ethics and human rights Over recent years it has been introduced directly and indirectly in several legal regimes culminating in international law with the 2016 expanded remit of the International Criminal Court which now includes environmental disasters This book celebrates the 25th anniversary of the Global Ecological Integrity Group GEIG which includes more than 250 scholars and independent researchers worldwide from diverse disciplines including ecology biology philosophy epidemiology public health ecological economics and international law It reviews the role of ecological integrity across a number of fields through inter and trans disciplinary engagement on matters affecting and governing the sustainability of life for both present and future generations These include ethics environmental disasters crimes against humanity and environmental health and how such issues can be subject to sound governance and be incorporated into international law The book also looks forward to new applications of the concept of ecological integrity such as crimes that result in the exploitation of natural resources and the illegal dispossession of land

**The Lens of Ecological Law** Carla Sbert,2020-04-24 Containing an in depth study of the emerging theory and core of ecological law this book insightfully proposes a lens of ecological law through which the disparity between current laws and ecological law can be assessed The lens consists of three principles ecocentrism ecological primacy and ecological justice These principles are used within the book to explore and analyse the challenges and opportunities related to the transition to ecological law and to examine three key mining case studies [Earth Governance](#) Klaus Bosselmann,2015-07-31 The predicament of uncontrolled growth in a finite world puts the global commons such as oceans

atmosphere and biosphere at risk So far states have not found the means to protect what essentially is outside their jurisdiction However the ju **Circular Economy and Sustainable Value Creation through Eco-Innovation** Srikanta Patnaik, Leon Miller, Francesco Vigliarolo, 2025-05-28 Circular economy and sustainable value creation through eco innovation are interconnected concepts that revolve around creating a more sustainable and environmentally friendly approach to economic growth and business development In a world confronted by pressing environmental challenges the need for sustainable economic practices has never been more urgent The traditional linear economic model characterized by the take make dispose approach has led to resource depletion environmental degradation and social inequalities In response to these challenges the concepts of circular economy and eco innovation have emerged as powerful frameworks for reshaping our economic systems to prioritize sustainability The circular economy represents a paradigm shift from the linear economic model that has dominated for centuries Instead of viewing resources as finite and disposable the circular economy embraces the idea that resources can be kept in circulation for as long as possible thereby minimizing waste and environmental impact At the core of the circular economy is the efficient use of resources This entails reducing resource consumption reusing products and materials and recycling to extend the life of resources Products are designed with durability and ease of repair in mind ensuring they have a longer lifespan and can be easily maintained Circular practices aim to restore natural systems and reduce harm to the environment whether through reforestation soil regeneration or sustainable agriculture

*Research Ethics for Environmental Health* Friedo Zölzer, Gaston Meskens, 2021-12-19 Research Ethics for Environmental Health explores the ethical basis of environmental health research and related aspects of risk assessment and control Environmental health encompasses the assessment and control of those environmental factors that can potentially affect human health such as radiation toxic chemicals and other hazardous agents It is often assumed that the assessment part is just a matter of scientific research and that control is a matter of implementing standards that

unambiguously follow from that research But it is less commonly understood that environmental health also requires addressing questions of an ethical nature Coming from multiple disciplines and nine different countries the contributors to this book critically examine a diverse range of ethical concerns in modern environmental health research This book will be of great interest to scholars and practitioners of environmental health as well as researchers in applied ethics environmental ethics medical ethics bioethics and those concerned with chemical and radiation protection

*The Safe Operating Space Treaty* Klaus Bosselmann, Paulo Magalhães, Will Steffen, 2016-04-26 It is clear that international law is not yet equipped to handle the ecological goods and services that exist simultaneously within and outside of all states The global commons have always been understood as geographical spaces that exist only outside the political borders of states A vital good such as a stable climate exists both within and outside all states and shows traditional legal approaches to be ecological nonsense With the recent possibility of measuring and monitoring the state and functioning of the Earth System through the Planetary

Boundaries framework it is now possible to define a Safe Operating Space of Humankind corresponding to a biogeophysical state of Earth In this sense the Common Home of Humanity is not a planet with 510 million square kilometres but is a specific favourable state of the Earth System Recent major scientific advances anticipate a legal paradigm shift that could overcome the disconnection between ecological realities and existing legal frameworks If we recognize this qualitative and non geographic space as a Common Natural Intangible Heritage of Humankind all positive and negative externalities end up being included within a new maintenance system of the Common Home     Just Ecological Integrity Peter Miller,Laura Westra,2002 Table of contents     **The Earth Charter in Action** Peter Blaze Corcoran,Mirian Vilela,Alide Roerink,2005 Essays by Mikhail Gorbachev Wangari Maathai Leonardo Boff Jane Goodall Ruud Lubbers and other authors on various aspects of the Earth Charter     **Human Rights, Environmental Law, and the Earth Charter** ,1998     *Environmental Law for Sustainability* Benjamin J Richardson,2006-03 This book presents critical new scholarship on the state of law for sustainable development from an international and comparative perspective     Gaining Ground International Fund for Animal Welfare,2006     **Globalization and Catholic Social Thought** John Aloysius Coleman,William F. Ryan,2005 Contributors to this volume assess the meaning of globalization and the capacity of Catholic social thought to understand reform and guide it     **Encyclopedia of Science, Technology, and Ethics** Carl Mitcham,2005 This encyclopedia considers both the professional ethics of science and technology and the social ethical and political issues raised by science and technology     **Encyclopedia of Sustainability** Robin Morris Collin,Robert W. Collin,2010 Surveys the environmental economic and social justice impact of sustainable development covering topics ranging from green tourism and greenwashing to permaculture and voluntary simplicity     **Teaching Sustainability at Universities** Walter Leal Filho,2002 It is now beyond any doubt that higher education institutions around the world are beginning to recognize that they have a unique responsibility towards the goal of sustainability Universities are an integral part of the global economy and since they prepare most of the professionals who are occupying key positions today and who will do so in the future they are uniquely positioned to influence the direction we choose to take as a society This book published in cooperation with the University Leaders for a Sustainable Future ULSF documents a wide range of works undertaken in respect of sustainability teaching with inputs from various authors from countries as varied as Brazil Mexico Latvia South Africa UK Spain The Netherlands Canada and the United States Via the descriptions of approaches methods and projects it shows how different universities in various parts of the world are facing the challenge of sustainability in respect of teaching It is a state of the art publication with a strong technical substance distributed over 31 chapters and in excess of 570 pages It is a valuable tool to university lecturers researchers administrators university students and other professionals concerned with the implementation of a sustainable development dimension as part of university curricula     **Our Fragile World** Mostafa Kamal Tolba,2001     International Peace Update ,2001     Just Ecological Integrity Peter Miller,Laura Westra,2002
