Libraries in the Information Age Denise K. Fourie, Nancy E. Loe, 2016-05-23 The book *Library Media Connection* cited as something all librarians need to have on their shelves is now thoroughly revised for today's 21st century library environment Covering both technology and library practices the title has been a go to text for librarians and library school students since 2002 Since the second edition of this must have book was published in late 2009 libraries have undergone profound changes primarily linked to advances in technology We've seen the debut of RDA the release of new Pew Research library and Internet use data and the establishment of digital repositories community MakerSpaces and community reads programs Of course libraries have also been affected by the expanding use of social media This thoroughly updated title addresses all these changes and more bringing you up to date on the monumental shifts impacting librarianship The book is designed to introduce LIS students to the profession preparing them to enter an exciting and evolving world It clarifies the changing roles and responsibilities of library professionals new paradigms for evaluating information and characteristics and functions of today's library personnel Among other subjects chapters cover preparing materials for use circulation reference services ethics in the information age Internet trends and job search basics References websites and publications at the end of every chapter point to further resources and appendices supply information such as policies the library bill of rights and the Freedom to Read statement **Kansas Farmer, Mail & Breeze**, 1930 *The Death of the Artist* William

Deresiewicz, 2020-07-28 A deeply researched warning about how the digital economy threatens artists' lives and work the music writing and visual art that sustain our souls and societies from an award winning essayist and critic There are two stories you hear about earning a living as an artist in the digital age One comes from Silicon Valley There's never been a better time to be an artist it goes If you've got a laptop you've got a recording studio If you've got an iPhone you've got a movie camera And if production is cheap distribution is free it's called the Internet Everyone's an artist just tap your creativity and put your stuff out there The other comes from artists themselves Sure it goes you can put your stuff out there but who's going to pay you for it Everyone is not an artist Making art takes years of dedication and that requires a means of support If things don't change a lot of art will cease to be sustainable So which account is true Since people are still making a living as artists today how are they managing to do it William Deresiewicz a leading critic of the arts and of contemporary culture set out to answer those questions Based on interviews with artists of all kinds *The Death of the Artist* argues that we are in the midst of an epochal transformation If artists were artisans in the Renaissance bohemians in the nineteenth century and professionals in the twentieth a new paradigm is emerging in the digital age one that is changing our fundamental ideas about the nature of art and the role of the artist in society *Good Housekeeping*, 2008 *Implementing Triple Bottom Line Sustainability into Global Supply Chains* Lydia Bals, Wendy Tate, 2017-09-08 The global sustainability challenge is urgent tremendous and increasing From an ecological perspective the current worldwide resource footprint requires approximately

1.5 planets to sustain existing life and with current usage would require two planets by 2030. The social impact of ever growing resource use disproportionately affects the world's poor: the 3 billion people living on less than \$2.50 a day as they struggle to acquire what is needed to survive. The serious ecological and social challenges we face in trying to establish global sustainable supply chains must not be underestimated yet so far research has largely ignored the social dimension in favour of the environmental and economic. So how can we develop business strategies that move away from a primary economic focus and give equal weight to people, planet and profit? How can we create sustainable supply chains that take a true triple bottom line approach? *Implementing Triple Bottom Line Sustainability into Global Supply Chains* features innovative research highlighting new cases, approaches and concepts in how to successfully implement sustainability covering economic, ecological and social dimensions into global supply chains. The four parts cover the rationale for sustainable global supply chains, key enablers, case studies showing clear implementation steps and directions for future research and development. This book is a must read for any academic researching in sustainable supply chain management, procurement or business strategy and for business leaders seeking cases that will inform a critical step forward for CSR programmes. **Good Housekeeping Magazine**, 2008
