

Word Chains

For Phonological Awareness and Phonics Practice

**Close pairs, FLOSS, k/ck, ch/tch,
ge/dge and consonant digraphs**

About this resource

This resource is a set of 10 reusable word chain activities for practicing **phonological awareness** with a focus on medial vowels, close consonant blends and key spelling generalisations including FLOSS, k/ck, ch/tch and ge/dge. They also support phonics learning as each set focusses on a different spelling generalisation or set of sounds.

These sets are ideal for in-class or home **revision** and **vacation homework**. They can be used in a Tier 1 class, intervention settings, or acceleration work. Once made, they are reusable.

They are suitable to use with young children through to teenagers and adults who have phonological awareness challenges.

How to use this resource

- Print cards, cut out and laminate (if using)
- Give students an erasable whiteboard or the provided letter cards.
- Read the words one at a time to students.
- Before reading each word say: "Change one sound to make ..."
- Students erase the relevant letter and replace it with the 'new' one or choose the relevant letter tile to change the word.
- Students read the word.

Some words are real and some are nonsense. Nonsense words have been chosen so phoneme manipulation can be done one sound at a time. This is not a vocabulary exercise.

Tier 1/Intervention Adaptation

Use the letter tiles first to reduce the cognitive load of letter formation. Transition to using a whiteboard when less support is required.

insufficiently for teacher training and technical support Likewise studies suggest that few parents know how to properly assist children s computer learning much computer time at home may be wasted time drawing children away from other developmentally important activities such as reading hobbies or creative play Moreover Dr Healy finds that much so called learning software is more edutainment than educational teaching students more about impulsively pointing and clicking for some trivial goal than about how to think to communicate to imagine or to solve problems Some software used without careful supervision may also have the potential to interrupt a child s internal motivation to learn Failure to Connect is the first book to link children s technology use to important new findings about stages of child development and brain maturation which are clearly explained throughout It illustrates through dozens of concrete examples and guidelines how computers can be used successfully with children of different age groups as supplements to classroom curricula as research tools or in family projects Dr Healy issues strong warnings however against too early computer use recommending little or no exposure before age seven when the brain is primed to take on more abstract challenges She also lists resources for reliable reviews of child oriented software suggests questions parents should ask when their children are using computers in school and discusses when and how to manage computer use at home Finally she offers a thoughtful look at the question of which skills today s children will really need for success in a technological future and how they may best acquire them Based on years of research into learning and hundreds of hours of interviews and observations with school administrators teachers parents and students Failure to Connect is a timely and eye opening examination of the central questions we must confront as technology increasingly influences the way we educate our children New York State Education ,1930 *The Software Encyclopedia* ,1986 **Minnesota Journal of Education** ,1958 **Resources in Education** ,1984 *InCider* ,1989
