Handbook of Clinical Interviewing With Children Michel Hersen, Jay C. Thomas, 2007-08-08 The *Handbook of Clinical Interviewing with Children* is one of three interrelated handbooks on the topic of interviewing for specific populations. It presents a combination of theory and practice plus concern with diagnostic entities for readers who work or one day will work with children and their parents and teachers in clinical settings. The volume begins with general issues, structured versus unstructured interview strategies, developmental issues when working with children, writing up the intake interview, etc. It moves to a section on major disorders with special relevance for child populations: conduct disorders, attention deficit hyperactivity disorder, learning disorders, etc. and concludes with a section addressing special populations. **Selection Interviewing** Bradford D. Smart, 1983 **Handbook of Employee Selection** James L. Farr, Nancy T. Tippins, 2013-09-13 The *Handbook of Employee Selection* summarizes the state of science and practice in the field of employee selection. Chapters in this book cover issues associated with measurement such as validity and reliability as well as practical concerns around the development of appropriate selection procedures and implementation of selection programs. Several chapters discuss the measurement of various constructs commonly used as predictors, and other chapters confront criterion measures that are used in test validation. Ethical and legal concerns are dealt with in another set of chapters and highlight the concerns of the employer as well as the test taker and the psychologist responsible for the testing program. Final sections of the book include chapters that focus on testing for certain types of jobs, e.g. blue collar jobs, supervisory jobs, and describe important milestones in the development of selection programs. **The**
