accounting is not concerned with whether an item is includable in income or deductible or even with the character of the item but when it may be reported One may ask how can a book's sole subject be when Consider the following issues which relate to timing Under the annual accounting doctrine should tax accounting be transactional or periodic Should an item of income be considered income upon receipt even though the taxpayer might be obligated to return the item What if the item is in dispute should it be picked up as income or be deferred If a taxpayer takes a deduction in a previous year but recovers the item in a subsequent year should the item recovered be income If the taxpayer dissolves his corporation and recognizes capital gain and is obligated to pay a liability of the corporation is the deduction ordinary or capital What tax year should a partnership S corporation personal holding company or regular corporation use What are the alternatives for the taxpayer Can taxpayers make elections to use tax years other than those that are required If the taxpayer is using an erroneous tax year how is the error corrected What are the requirements for choosing methods of accounting How does a taxpayer adopt a method of accounting Should the taxpayer be using the cash method of accounting if so how should the taxpayer maintain his books How should the books clearly reflect income When a taxpayer receives a promissory note does the taxpayer have income Can the taxpayer defer income If a taxpayer is involved in a commercial transaction and deposits the money in escrow until the following year when does the taxpayer have income If a taxpayer decides to prepay some year end expenses can the taxpayer take a deduction before the expenses are utilized What are the rules for the taxpayer who is required to use the accrual method of accounting Is title important to an accrual method taxpayer What if the income is recognized but may not be collected can the accrual taxpayer not report income If an accrual method taxpayer receives prepaid income must it always recognize income How does prepaid income relate to generally accepted accounting principles and financial accounting If a taxpayer is using an erroneous method of accounting can it change to a proper method or must it seek permission from the Commissioner What if the Commissioner determines that a taxpayer is using an improper method of accounting what are the consequences What are the rules for the sale of containers routable spare parts COD sales consignment etc Can small businesses which sell merchandise use the cash method under certain circumstances If a taxpayer is required to use the uniform capitalization rules under IRC 263A what exceptions are there What is the small reseller exception What is the small producer exception How does a taxpayer determine ending inventory including additional uniform capitalization costs If a taxpayer is a reseller what items will be purchasing cost labor costs and handling cost What are the simplified methods for determining additional IRC 263A cost to ending inventory How are these methods implemented What are the tax accounting rules for multiple businesses Can a business maintain two separate methods of accounting What are the interest capitalization rules required under IRC 263A If the taxpayer is engaged in an installment sale will the installment sale be qualified under IRC 453 What are the exceptions to IRC 453 How is installment gain determined If the taxpayer engages in a contingent payment sale how is the sale reported Can dealers engage in installment
