

Taxicab Geometry

Created by Sian Zelbo, 1001mathproblems.com

Two friends, Albert and Betty, decide to meet for lunch.

If they meet where the X is on the map, it will be 5 blocks from where Albert is and 3 blocks from where Betty is. Why is this? (They must travel along the streets and can not cut through the blocks diagonally).

The questions below ask you to find all possible meeting points that satisfy a certain rule. You should think about the shapes made by each set of points. If you want a challenge, try to visualize and describe the shapes even before putting pencil to paper.

- 1 Find all points that are exactly 4 blocks from Albert.
- 2 Find all points that are exactly the same distance from both friends.
- 3 Find all points that are no more than 5 blocks from both friends.
- 4 Find all points that are exactly 4 blocks from either friend.
- 5 Find all points where the sum of the two distances is exactly 6 blocks.
- 6 For experts: find all points that are 3 times farther from Albert as from Betty.
