The Motorization of American Cities David J. St. Clair, 1986 Scimitar 1800 Ti 3 L GT GTE **The Motorization of American Cities** David James St. Clair, 1986 *Planning the Twentieth-century American City* Mary Corbin Sies, Christopher Silver, 1996 Arguing that planning in practice is far more complicated than historians usually depict the authors examine closely the everyday social political economic ideological bureaucratic and environmental contexts in which planning has occurred In so doing they redefine the nature of planning practice expanding the range of actors and actions that we understand to have shaped urban development The American City Arthur Hastings Grant, Harold Sinley Buttenheim, 1925 *The American City & County*, 1915 Town & County Edition of The American City, 1918 *The Public Works Department in American Cities* Clarence Eugene Ridley, 1929 **Car Country** Christopher W. Wells, 2013-05-15 For most people in the United States going almost anywhere begins with reaching for the car keys This is true Christopher Wells argues because the United States is Car Country a nation dominated by landscapes that are difficult inconvenient and often unsafe to navigate by those who are not sitting behind the wheel of a car The prevalence of car dependent landscapes seems perfectly natural to us today but it is in fact a relatively new historical development In Car Country Wells rejects the idea that the nation's automotive status quo can be explained as a simple byproduct of an ardent love affair with the automobile Instead he takes readers on a tour of the evolving American landscape charting the ways that transportation policies and land use practices have combined to reshape nearly every element of the built environment around the easy movement of automobiles Wells untangles the complicated relationships between automobiles and the environment allowing readers to see the everyday world in a completely new way The result is a history that is essential for understanding American transportation and land use issues today Watch the book trailer <http://www.youtube.com/watch?v=48LTKOxxrXQ> The American City Harold S. DiMento, Cliff Ellis, 2013 The story of the evolution of the urban freeway the competing visions that informed it and the emerging alternatives for more sustainable urban transportation Urban freeways often cut through the heart of a city destroying neighborhoods displacing residents and reconfiguring street maps These massive infrastructure projects costing billions of dollars in transportation funds have been shaped for the last half century

by the ideas of highway engineers urban planners landscape architects and architects with highway engineers playing the leading role In *Changing Lanes* Joseph DiMento and Cliff Ellis describe the evolution of the urban freeway in the United States from its rural parkway precursors through the construction of the interstate highway system to emerging alternatives for more sustainable urban transportation DiMento and Ellis describe controversies that arose over urban freeway construction focusing on three cases Syracuse which early on embraced freeways through its center Los Angeles which rejected some routes and then built I 105 the most expensive urban road of its time and Memphis which blocked the construction of I 40 through its core Finally they consider the emerging urban highway removal movement and other innovative efforts by cities to re envision urban transportation

THE AMERICAN CITY, 1928 **Essays on Sunbelt Cities and Recent Urban America** Raymond A. Mohl, 1990 For centuries scholars have scrutinized the cities of the Old World poking into ruins and libraries for unwritten and written clues to origins and demise The American cities that have played major roles in the history of the United States have also had their share of study But only recently have historians applied systematic analysis to what is now called the Sunbelt where half the nation s ten largest cities are located cities that have grown astronomically since World War II This volume brings together the important findings of leading urban historians Addressing a variety of topics such as the reasons behind the Sunbelt s boom their essays place the sunbelt phenomenon within the larger context of urban development nationwide Kenneth T Jackson begins the introduction by pointing out the problem of defining the Sunbelt and the reasons for urban growth in the sunbelt areas during the post World War II era Essays by Robert Fisher Roger W Lotchin and Robert B Fairbanks focus on specific cities and leadership issues on the attitudes that shaped Houston on the military s role in the urban development of San Diego and on the politics of governing Dallas from 1930 to 1960 An essay by Carl Abbott looks at the distinctive physical characteristics of cities in the Southwest Raymond A Mohl s essay on the transformation of urban America since 1945 and Zane L Miller s essay on Walter Prescott Webb and cultural regionalism provide broader contexts in which to view and understand urban sunbelt development The essays of this volume reflect the individual authors different methodologies and approaches Taken together they highlight the belief that national development and twentieth century urban trends were as important in shaping sunbelt cities as was the regional culture
