Communication Networks R. Srikant, Lei Ying, 2013-11-14 Provides a modern mathematical approach to the design of communication networks for graduate students blending control optimization and stochastic network theories A broad range of performance analysis tools are discussed including important advanced topics that have been made accessible to students for the first time Taking a top down approach to network protocol design the authors begin with the deterministic model and progress to more sophisticated models Network algorithms and protocols are tied closely to the theory illustrating the practical engineering applications of each topic The background behind the mathematical analyses is given before the formal proofs and is supported by worked examples enabling students to understand the big picture before going into the detailed theory End of chapter problems cover a range of difficulties with complex problems broken into several parts and hints to many problems are provided to guide students Full solutions are available online for instructors **Communication**

Networks Jean Walrand, Shyam Parekh, 2017-12-04 This book results from many years of teaching an upper division course on communication networks in the EECS department at the University of California Berkeley It is motivated by the perceived need for an easily accessible textbook that puts emphasis on the core concepts behind current and next generation networks After an overview of how today's Internet works and a discussion of the main principles behind its architecture we discuss the key ideas behind Ethernet WiFi networks routing internetworking and TCP To make the book as self contained as possible brief discussions of probability and Markov chain concepts are included in the appendices This is followed by a brief discussion of mathematical models that provide insight into the operations of network protocols Next the main ideas behind the new generation of wireless networks based on LTE and the notion of QoS are presented A concise discussion of the physical layer technologies underlying various networks is also included Finally a sampling of topics is presented that may have significant influence on the future evolution of networks including overlay networks like content delivery and peer to peer networks sensor networks distributed algorithms Byzantine agreement source compression SDN and NFV and Internet of Things **Shockwave 3D** Jason Wolf, 2002 The ultimate cut to the chase manual for 3D Web and interactive designers
