Summary of The Master Algorithm by Pedro Domingos QuickRead, Lea Schullery, How the Quest For the Ultimate Learning Machine Will Remake Our World According to Pedro Domingos one of the greatest mysteries of the universe is not how it begins or ends or what infinitesimal threads it's woven from it's what goes on in a small child's mind how a pound of gray jelly can grow into a seat of consciousness Even more astonishing is how little role parents play in teaching the brain to go through this transformation as it largely does it all on its own Today scientists computer engineers and more are working towards a machine that can do exactly what the human brain does learn With all the technology of today machines may one day even become smarter than the human brain Computers can learn from large sets of data that we may not even realize is getting collected This means that our future can be run by technology changing the way we live and interact with each other As you read you'll learn how machines will one day be like the human brain how there is no such thing as a perfect algorithm and how a Master Algorithm is on its way to being created Do you want more free book summaries like this Download our app for free at <https://www.QuickRead.com> App and get access to hundreds of free book and audiobook summaries
