Nilson, Joseph A. women involved in working in space and a weightless environment Unfortunately since the war in the Ukraine Russia s relationship with the West has deteriorated considerably and co operation within the space program is very limited although the two main powers have reached an agreement regarding the transportation of crews and supplies to the ISS It is thought however that the International Space Station days are numbered and will close in 2031 The book also makes reference to only a small number of Kosmos missions those mentioned are the only ones with any connection to space exploration The remainder and there have been over 2 500 Kosmos missions were either military or scientific satellites Library & Information Science Abstracts ,1972 Merrill Earth Science Ralph M.
