OECD Reviews of Tertiary Education Tertiary Education for the Knowledge Society Paulo Santiago, 2008-09-22 Tertiary education policy is increasingly important on national agendas. The widespread recognition that tertiary education is a major driver of economic competitiveness in an increasingly knowledge driven global economy has made high quality tertiary education more important than ever. The imperative for countries is to raise higher level employment skills to sustain a globally competitive research base and to improve knowledge dissemination to the benefit of society. Tertiary Education for the Knowledge Society provides a thorough international investigation of tertiary education policy across its many facets: governance, funding, quality assurance, equity, research and innovation, academic career links to the labour market and internationalisation. The report presents an analysis of the trends and developments in tertiary education, a synthesis of research based evidence on the impact of tertiary education policies, innovative and successful policies and practices that countries have implemented and tertiary education policy options. The report draws on the results of a major OECD review of tertiary education policy, the OECD Thematic Review of Tertiary Education conducted over the 2004-08 period in collaboration with 24 countries around the world.
